The new industrial South is daily awakening to its wonderful resources. No other section of the Globe is as fortunate as our South. Our soil, climate and undeveloped resources are now calling countless thousands of people, forming but the vanguard of the hosts which are to follow. Gone forever are the old days of one crop farming in the South. This condition was in the past made possible only through limited home markets for our produce. Our rapidly increasing population furnishes today good home markets throughout the South. This new industrial South must be fed. The market is here, and agricultural prosperity will be ours.
To my friends:

I take this opportunity, at the beginning of our forty-seventh year in the seed business, to thank you for your splendid patronage. You have shown by your ever increasing patronage that you appreciate our seed service. Since the beginning of this business quality has been the foundation of our endeavor. Not how cheap but how good is the thing to consider, especially in Seeds. After all, you will find that Mayo's Seeds will actually cost you little, if any more than ordinary seeds—each article produced in sections best adapted to each particular variety. Our quality distribution allows us a most favorable production cost and this we are pleased to pass on to our customers.

Yours very truly,

D. R. Mayo,

Knoxville, Tennessee, January 1st, 1926.

DIRECTIONS FOR ORDERING

SEEDS POSTPAID BY MAIL. Prices quoted on all vegetable and flower seeds, excepting where (express) are listed, include postage paid on all packets, ounces, ½ pounds, ½ pounds and 2 pounds to all parts of the United States. Prices quoted on larger quantities do not include postage, these are F. O. B. Knoxville. Remember that it is often cheaper to send larger quantities of seeds by parcel post than it is by express or freight, especially when you take into consideration that parcel post is delivered to your door which saves you the expense of making a trip to the depot. In remitting for these larger amounts, be sure and include postage. It is easy to figure the postage rates, your postmaster or your rural carrier can help you do this.

SEEDS BY FREIGHT AND EXPRESS. We deliver all Freight and Express shipments to the depots and the purchaser pays the transportation charges. It is cheaper to ship large orders by freight. Knoxville has railroads radiating to all parts of the Central South. These give good quick service, and Knoxville has cheap freight rates to all Southern points. We will gladly quote you the freight rates to your shipping point at your request.

PREMIUMS. Please be sure that you understand our Premium offer. When you order as much as one dollar's worth of seeds which are priced in packets or in ounces, then you may select 25c worth of seeds in packets and ounces as a premium. This offer is for seeds in packets and ounces only. It does not apply to ½ pounds, ½ pounds, 1 pound, 2 pounds and over. Neither does our premium offer apply to any of our collections of seeds, plants, bulbs, etc., as these are all net.

ABOUT WARRANTY. I give no warranty express or implied, as to description, quality, productiveness, or any other matter of any seeds, plants or bulbs I send out, and I will not be in any way responsible for the crop. If the purchaser does not receive the goods on these terms they are to be at once returned and the amount paid will be refunded. Furthermore, the purchaser may submit any seeds purchased from me to any test that he may desire, and if unsatisfactory, the seeds may be returned to me within a reasonable time and the amount paid will be refunded. No responsible seedmen gives any warranty; for there are so many things besides the seeds on which the success of a crop is dependent.

D. R. Mayo.

Have A Home Garden This Year

The home garden is one of our greatest institutions. This practice should be constantly encouraged by everyone. Too many farmers sadly neglect their garden. Every farm home should have a well planned, and well cultivated garden. There is nothing which you can do which will directly add to your income as much as a good garden. A constant supply of good green vegetables throughout the summer and fall will save you many a dollar. Do not live out of the store, live from your garden. Plant and cultivate a big garden. Be sure and can a good supply of your vegetables for winter use. There is no danger in planting too much garden, for even if there is a surplus after your table and canning needs are filled, what is left can be profitably fed to the chickens and hogs on the farm.

For the city man a good home garden is a splendid thing. Gardening is a most lucrative as well as pleasant form of exercise. Make your recreation bring in financial as well as healthful results. Do not neglect the flowers. Remember that it is only through the beautiful that we can see life as we should. Flowers are necessary. Do your part to brighten up the surroundings around you.

### PLANTING CALENDAR — What and When to Plant

This information is for Knoxville and sections of similar climate and location. For other sections allowance must be made according as they are early or late. Allow about six days difference for every hundred miles north or south.

#### January

#### February

#### March
This is the busiest month of the garden. Plant the wrinkled varieties of Peas. Sow outdoor Carrots, Cabbage, Beets, Lettuce, Parsnips, Leek and Onion Seed. Plant Irish Potatoes, Asparagus, Rhubarb Roots, and Onion Sets. Set out Cauliflower, Cabbage, Onions and Lettuce plants from the hot bed. Be sure and plant some of Mayo’s Brown Bunch Beans this month. Sow most any kind of hardy flower seeds and also some Sweet Peas. Late in this month plant some of Mayo’s Best Early Roastingear Corn. Sow Lawn Grass Seed.

#### April

#### May
All varieties of seeds can now be planted; Bush Beans, Pole Beans, Lima Beans, Sugar Corn, Beets, Salsify, Parsnips, Squash, Cucumbers, Okra, Canteloupes, Watermelons, Pumpkins, Cress, Carrots, Lettuce, Endive and Kohl Rabi. Set out Pepper, Tomato, and Egg Plants. Sow Herbs of all sorts. Sow Lawn Grass Seed.

#### June
Plant Sugar Corn and Early Roastingear Corn, Cucumbers, Melons, Squash, Pumpkins. Set out Sweet Potato Plants. Pepper Plants, Tomato Plants, and Egg Plants. Sow Cabbage, Radishes, Collards, and Endive for late use. Begin to put out late crop Potatoes.

#### July
Plant Cucumbers, Tomatoes, Cabbage for late crop, Pole Beans, Bunch Beans, Lima Beans, Roastingear Corn, Sweet Corn, Okra, Squash, Lettuce and Summer Radishes. Sow Ruta Baga and a few Turnips.

#### August

#### September
Sow Radishes, Lettuce, Kale, Spinach, Endive, every variety of Turnips, Onion seed for transplanting. Set out Onion Sets. Sow Lawn Grass Seed.

#### October
Sow Kale, Spinach and winter Radishes. Sow Cabbage outside for transplanting into cold frames next month. Lettuce in beds for winter use. Set out Onion Sets. Plant fall bulbs, such as Roman Hyacinths, Dutch Hyacinths, Tulips, Narcissus, Crocus and Hardy Lilies in the flower garden. Sow Lawn Grass Seed.

#### November
Set out Onion Sets, and cover the rows with some fresh manure. Also sow Spinach. Plant out Flowering Bulbs for Spring blooming. Sow Lawn Grass Seed.

#### December
Asparagus

One ounce will produce about 200 plants. 4 to 5 pounds to the acre.

Culture: For Growing Plants: Good loamy garden soil. Sow in rows 12 to 15 inches apart, just as soon as the ground can be worked in the spring. Cultivate good, and later thin the plants to stand 2 to 3 inches apart.

For Permanent Bed: Deep, warm, rich soil is required. Use manures and fertilizers freely. Make furrows 2 to 4 feet apart, and 8 to 10 inches deep. Set the two year old plants 18 to 24 inches apart in the bottom of the furrows; then cover only lightly at first, and gradually fill in with soil and compost. The next spring fork or plow the bed shallow with great care, or pulverize the surface by harrowing. Give clean cultivation until fall; then cover with manure or compost. Second season after planting hill up the rows for blanching, and cut sparingly for use. After this the bed will give full crops.

While we can supply you with the seeds the best results are obtained quicker by the use of plants. The cost is moderate. However, if you are growing Asparagus on a large scale, it will pay you to buy the seeds and grow your own plants.

Asparagus Seed (No. 11)

Palmetto—Large and productive, tender and of excellent quality. Packet, 6c; ounce, 15c; ¼ pound, 25c; 1 pound, 80, postpaid; 1 pound, 75c, express.

(Lima Beans

One Pound will plant 50 feet of row, 45 pounds to one acre.

Culture: Plant soon as the soil is warm in the spring, and only when all danger of frost and cold weather is past. Make the rows 2 feet apart, and 6 inches apart in the rows.

Burpee's Bunch Lima (No. 13)

This is the earliest maturing of the large seeded Lima Beans. Vines are hardy and productive. The pods are large, thick and containing usually four beans, which are thick, of largest size and splendid quality. The seed are of a greenish white color. We regard this as one of the best variety of large seeded bunch Lima Beans for the South. Prices: Postpaid, packet, 10c; ½ pound, 30c, pound, 50c; 2 pounds, 90c. Not postpaid, 15 pounds, $3.75.

Bunch Lima or Dwarf Sieva, Henderson's (No. 14)

A dwarf variety of the Pole Sieva. Known in the South as the Butter Bean. This is the earliest and best variety of the small Lima Bean for this section. The vines are without runners and continue to bear until stopped by frost. The pods are short, flat, and contain two to four beans of splendid quality, either shelled, green or dry. Prices: Postpaid, packet, 10c; ½ pound, 20c; pound, 40c; 2 pounds, 70c. Not postpaid, 15 pounds, $3.00.
Mayo’s 3 Best Lima Beans For: 1925, 20c Postpaid (No. 15)

The Lima Beans are the aristocrats of the bean family. These delicious mild flavor beans are greatly appreciated by all. They are very nutritious and are easily cooked. Lima Beans are easily grown. Every home garden should include a good planting of Lima Beans. We have decided to offer one good size packet of Burpee’s Bush Lima, King of the Garden Pole Lima and Henderson’s Bush Lima, all for 20c, postpaid.

FORDHOOK BUSH LIMA—Bush (No. 16)

One of the best large seeded varieties of Lima Beans. The plant is vigorous and erect growing. The pods are formed in clusters. They are from four to five inches long, and contain three to five large thick beans of exceptionally fine flavor. Prices: Postpaid, packet, 15c; ½ pound, 30c; 1 pound, 50c; 2 pounds, 90c. Not postpaid, 15 pounds, $4.00.

King of the Garden Lima—Pole (No. 17)

Vines vigorous and productive. Pods long and filled with four or five very large, white beans. Quite a favorite with the market gardeners. Prices: Postpaid, packet, 10c; ½ pound, 20c; pound, 40c; 2 pounds, 75c. Not postpaid, 15 pounds, $3.00, 100 pounds, $18.00.

Large White Lima—Pole (No. 18)

The standard variety for the South. None better. Vine vigorous, tall growing, but slender. Leaves are smooth and light green. Pods are borne in clusters, and are long, broad, flat and very thin. The seed are large and flat, of a greenish white color. Prices: postpaid, packet, 10c; ½ pound, 20c; pound, 40c; 2 pounds, 75c. Not postpaid, 15 pounds, $3.25; 100 pounds, $20.00

Small White Lima or Sieva Pole (No. 19)

In many localities this is known as the Butter Bean. This is the best variety of the small white Lima Pole Beans. It is early and productive, the pods are curved, short and flat. Seeds are white, small and flat. Prices: postpaid, packet, 10c; ½ pound, 20c; 1 lb., 40c; 2 lbs., 75c. Not postpaid, 15 lbs., $3.00; 100 lbs., $18.00.

BUSH BEANS

One quart will plant 100 feet. 1 bushel to the acre.

Culture: Beans are very tender and are apt to be killed by any late frost. However, it often pays to take these risks. Plant in warm, loamy soil, beginning the last of March, and keep planting at frequent intervals for succession until August 15. Make the rows 2 feet apart, or wide enough for cultivation, and a few inches apart in the rows. Give close cultivation, but only work when the vines are dry. Gather the pods of all string beans clean, as soon as fit for use, whether needed or not; for if left to dry on vines it stops production.

Improved Extra Early Red Valentine (No. 26)

Extra early round pod. It is a splendid shipper. Not quite as early as the Brown Bunch. However, this is a good old standard variety. Postpaid, packet, 10c; ½ pound, 20c; pound, 40c; 2 pounds, 70c. Not postpaid, 15 pounds, $2.50; 100 pounds $15.00.

Stringless Green Pod (No. 27)

This is the best variety for a second early snap bean. It should be planted after our Mayo’s Brown Bunch Beans. The plants are medium large, of some what spreading growth, with dark foliage and always strictly bush form. The pods are medium in length, slightly curved, and are thick. The color of the pod is rich green of an attractive appearance. The pods are tender and brittle, of very fine texture and delicate flavor. When cooked the pod retains a good green color. Prices: Packet, 10c; ½ pound, 25c; 1 pound, 40c; 2 pounds, 75c; not postpaid, 15 pounds, $3.00; 100 pounds, $18.00.
Mayo’s Brown Bunch Beans

This is a Mayo contribution to the American Garden. We introduced this bean on the Knoxville market thirty-six years ago. Since that time our sales on it have steadily increased till today this is the main variety of Bunch Beans in the Appalachian section of the South. There has always been a great demand for an early bean which would have good quality. Usually in most vegetables quality has to be somewhat sacrificed to earliness in securing an extra early kind. This is not so with Mayo’s Brown Bunch Beans. It is a splendid yielder, and will withstand more frost than any other bean known. In the Knoxville district thousands of bushels of these green beans come to the local market each day throughout the bearing season. This tremendous quantity of snap beans is usually quickly purchased by eager buyers for shipment to the nearby industrial markets. The large, long, flat, meaty pods, are borne in great abundance on sturdy plants.

Prices: Postpaid, packet, 10c; ½ pound, 30c; pound, 50c; 2 pounds, 90c. Not postpaid, 15 pounds, $4.00; bushel, 60 pounds, $15.00; 100 pounds, $25.00.
Mayo's Brown Bunch Bean. No. 28

Mayo's Original Strain of Brown Bunch Beans is the best early bunch bean known. The more we see of Mayo's Brown Bunch Bean, the better we like it. We introduced this bean on the Knoxville market thirty-six years ago. From that time to the present date it has kept its place as the best early bean. Unlike most early snap beans, the quality remains good throughout its bearing season and it is a favorite ter we like it. We introduced this bean on the Knoxville market thirty-six years ago. From that time to the present date, it has kept Bunch Beans. Plant this bean early, it will stand more early frost than any other bean. Year in and year out this variety is the earliest bean on the Knoxville market. This variety commands a premium at all times on the Knoxville market. People like it, and our sales have been increasing on this variety every year since we first introduced it. We have taken care to see that the good quality of our original strain has been carefully preserved. Be sure and plant the original Mayo's Brown Bunch Bean. The vines are prolific with large dark green crumpled leaves. The pods are long and flat. The large flat meaty pods have splendid flavor. Mayo's Brown Bunch Bean is very tender podded and is all bean. The seeds are light brown in color, and resembling the pods as somewhat flat. Prices: postpaid: Packet, 10c; ½ pound, 30c; 1 pound, 50c; 2 pounds, 90c. Not postpaid, 15 pounds, $4.00; 60 pounds, $15.00; 100 pounds, $25.00.

Giant Stringless Green Pod (No. 29)

Matures very early and produces large, handsome pods, which are from five to six inches in length. Stringless and of good quality. Prices: Postpaid: packet, 10c; ½ pound, 25c; pound, 40c; 2 pounds, 80c. Not postpaid, 15 pounds, $3.25; 100 pounds, $20.00.

Refugee or 1,000 to 1. (No. 30)

Pods nearly round, light green and about five inches long, tapering to slender point. Brittle, but has slight strings. Later than other early bunch beans, but is very prolific. Very popular with canners. Prices: Postpaid, packet, 10c; ½ pound: 25c; pound, 40c; 2 pounds, 90c. Not postpaid, 15 pounds, $3.00; 100 pounds, $17.00.

Wax Pod Beans

No. 31 Pencil Pod Black Wax. Packet, 10c; 1 pound, 50c; 2 pounds, 90c.
No. 32 Rust Proof Golden Wax. Packet, 10c; 1 pound, 50c; 2 pounds, 90c.

No. 33 White Wax. Packet, 10c; 1 pound, 50c; 2 pounds, 90c.

Pole Beans

MAYO'S STRINGLESS POLE BEAN (No. 43)

This wonderful Pole Bean introduced by us several years ago, is without a doubt the best pole bean in existence today. On every hand our customers are enthusiastic in their praise of this splendid bean. The flavor is wonderful, and no home garden is complete without Mayo's Stringless Pole Bean. It is heavy bearing. The pods are large and of deep green color, meaty, stringless, and of delicious flavor. The seeds are large, pearly white in color. Should the seeds be allowed to ripen they make splendid dry beans for Winter use. Prices: Postpaid, Packet, 15c; ½ pound, 30c; 1 pound, 50c. Our crops of this bean have never been large enough to supply the demand. Order early before our stocks are exhausted.

McCASLIN POLE BEAN (No. 45)

This variety is very popular in the South. It is heavy bearing. The pods are large and are well filled. The snap beans are deep green in color, meaty, stringless, and of good flavor. If vines are kept picked closely they will continue bearing throughout the season. Seeds white. Prices: Postpaid, Packet, 10c; ½ pound 25c; 1 pound 45c; 2 pounds, 85c; Not postpaid—15 pounds, $3.25; 60 pounds, $12.00.

Mayo's Special Home Garden Bean Collection (No. 35)

Snap beans are a very healthy diet. They are easily grown. They are easily prepared for the table. We want every one to plant liberally this season. A few minutes time each day will make you money in your garden. Here is a bargain that no small home garden should overlook. One full-sized packet of Mayo's Brown Bunch Beans, Stringless Green Pod Bunch Beans, and Red Valentine Beans all for 20c postpaid.
Bush Beans

Varieties for Shell Beans

The dried bean is an important factor in food today. We cannot urge too strongly for you to plant some of these this season. The dried bean will almost sustain life by itself. The bean will take the place of meat, and many other important foods. It is an easy matter for any one with a garden to grow enough of these to supply the family through the winter.

Remember that for dried use that these beans should not be planted before June or July, for if planted before that time the beans reach their maturity during the hot weather and are attacked by the bean weevil. You will not be troubled with this pest if planted late. Should you be troubled with the bean weevil, please write us and we will send instructions telling how to destroy it.

Write for prices on larger lots of beans than quoted in this book, stating quantities and varieties wanted.

Red Kidney (No. 36)

This bean seems particularly well adapted to this section of the country. Plant erect in growth, bearing a large number of large pods well filled with large red beans, of excellent flavor. This seems to be one of the largest yielders of beans in our immediate vicinity. Prices: Postpaid, Packet, 10c; ½ pound, 25c; 1 pound, 40c. Not postpaid, 15 pounds, $2.50; 60 pounds, $9.00.

White Kidney (No. 37)

Similar to the Red Kidney, but white in color. Prices: Packet, 10c; ½ pound, 25c; 1 pound, 40c. Not postpaid, 15 pounds, $2.25; 60 pounds, $8.00.

Yellow Eye (No. 38)

A large white bean with a yellow eye. This is a large yielder, and the beans are noted for their especially fine flavor when cooked. It is a large yielder. This is a splendid variety for home planting for dried use as the yield is good and the quality is splendid. Prices: Postpaid, Packet, 10c; ½ pound, 25c; 1 pound, 40c. Not postpaid, 15 pounds, $2.50.

Dwarf Horticultural (No. 39)

Pods are of a medium length, slightly curved, and when nearly developed are freely splashed with bright red on the yellowish green skin. The green beans are of good size, tender, and of fine flavor. If any beans are left over in the summer this makes a splendid soup bean for the winter. This variety is very popular on the Knoxville market. It is planted up to August 15, and begins to bear for use about fifty days from planting. Very often the late vines are pulled up and put in the cellar just before the first hard frosts, thus giving edible beans long after frost. Prices: Postpaid, Packet, 10c; ½ pound, 25c; 1 pound, 40c. Not postpaid, 15 pounds, $3.85; 60 pounds, $12.00.

White Marrow (No. 40)

This is the standard variety for a large Soup Bean. The beans are large, pure white in color. Splendid flavor when cooked. It is a splendid yielder. Prices: Postpaid, Packet, 10c; ½ pound, 25c; 1 pound, 40c. Not postpaid, 15 pounds, $2.50.

White Navy (No. 41)

This is the largest used bean for winter use in the country. Very productive. The quality is excellent. Beans are about half the size of the White Marrow. This is the Bean which is so largely used making the familiar baked beans. It is splendid for a soup bean. Remember that this variety should not be planted till late in the season. Prices: Postpaid, Packet, 10c; ½ pound, 25c; 1 pound, 40c. Not postpaid, 15 pounds, $2.50.

Write for Special Prices on Large Lots of These Beans

The prices are somewhat unsettled when this catalog is issued, and therefore we would suggest that you let us hear from you if you require bushel lots and above.
Pole Beans

One pound will plant 75 to 100 hills. 30 pounds to the acre.

Culture: Pole Beans require warm, rich soil. If planted in cold, soggy soil the seed will rot. Use poles 5 to 8 feet high, set in rows 4 feet apart each way. Plant 4 to 6 beans around each pole, and later thin out to three plants to a pole. When growing on a large scale and poles are not available, it is a good idea to sow in drills about 3 feet apart and a few inches apart in the rows. Then rig up a trellis of Bean twine, having poles at frequent intervals for support, and using wires at top and bottom.

Kentucky Wonder (No. 44)

This splendid early and productive variety of pole beans is perhaps the best general purpose pole bean on the market today. On good strong land, such as bottom land, this bean can be planted in the corn and used as a corn field bean. This variety climbs well. The pods are seven to nine inches long, are thick and fleshy, broad and well filled out; it is “saddle backed.” The pods are stringless, and are mild and sweet. If the pods are gathered as they mature, the vines will keep on bearing till the end of the season. Prices: Postpaid, packet, 10c; ¼ pound, 25c; pound, 40c; 2 pounds, 75c. Not postpaid, 15 pounds, $2.75; 60 pounds, $10.20; 100 pounds, $17.00.

Red Speckled Cutshort (No. 47)

This is the best of all the cutshort beans. It is especially recommended as a cornfield bean. The pods are small and are well filled with seed. The seeds are flesh colored, rather densely covered with red splashes. Prices: Postpaid, packet, 10c; ¼ pound, 25c; pound, 40c; 2 pounds, 75c. Not postpaid, 15 pounds, $3.00.

White Creasback (No. 48)

The green pods are 6 inches long, perfectly round, deeply creased or saddle backed. Very fleshy. The seed are pure white, and the dry seeds can be used for baking. This variety is not as popular as it once was, due to the fact that under some conditions the pods are sometimes tough hulled. Its strong point now is that it can be used as a combination bean, some of the pods can be served as snap beans, and where the seed are left to dry on the vines these seed can be used for winter dry beans. It is very productive. Prices: Postpaid, packet, 10c; ¼ pound, 25c; pound, 40c; 2 pounds, 75c. Not postpaid, 15 pounds, $3.00.

Lazy Wife (No. 49)

Sometimes known as the White October. Derives its name from the fact that the pods are entirely stringless, thus saving the wife the trouble of stringing preparatory to use. The pods are of medium dark green color, and are produced in great abundance, measuring from four and one-half to six inches in length. Each pod contains from six to eight beans, which are excellent for winter shell beans. Prices: Postpaid, packet, 10c; ¼ pound, 30c; pound, 45c; 2 pounds, 85c. Not postpaid, 15 pounds, $3.00.

Striped Creasback (or Scotia) (No. 50)

This is perhaps the best variety of the Creasback pole beans. It is true to type. The seed are grayish brown striped with black. Pods are from five to six inches long and are well filled with seed. This is a very tender and mild bean. It is a good yielder and very popular. Prices: postpaid, packet, 10c; ¼ pound, 25c; pound, 40c; 2 pounds, 75c. Not postpaid, 15 pounds, $3.00.
Table Beets

One ounce will sow 50 feet of drill, 5 to 6 pounds to the acre.

Culture

Culture: For the table sow in March, and follow at frequent intervals for succession until August. Have the rows 16 to 20 inches apart, and sow about one inch deep. Give good cultivation, and then thin to 3 to 4 inches apart in the rows.

Beets are easily grown. They should be included in every home garden. Plant enough to can for Winter. Canned Beets are delicious and are much appreciated in the long Winter months.

Mayo's Beet Seeds:
Are grown by experts. If you want the best, plant Mayo's Seeds.

Mayo's Blood Turnip Beet

MAYO'S EARLY WONDER (No. 51).

For the market gardener or for family use this variety is unequalled. Its marked uniformity of type is a strong point in its favor. It will strongly appeal to the grower for the market, while the beautiful dark red color combined with the tender and delicious flavor makes this variety everything its name implies. A Wonder. For earliness, good shape and absence of white rings, it stands today as one of the best beets of the last decade. A trial will convince anyone of its marked characteristics. We anticipate that this variety will rapidly become popular as it is giving such excellent results wherever it is tried. Mail your order at once. Prices: Packet, 10c, ounce 15c, ¼ pound, 25c; 1 pound, $1.55 Postpaid; 1 pound, $1.50, Express.

MAYO'S EARLY BLOOD TURNIP (No. 52).

A good standard variety. It is early maturing, a small top, and is upright growing, thus permitting the rows to be close together. Leaf and stem veined dark red; blade green; root ovid with very smooth dark skin; flesh deep vermilion red, zoned with darker red, very crisp, tender and sweet; remaining so for a long time. Prices: Packet, 5c; ounce, 15c; ¼ pound, 45c; 1 pound, $1.55, postpaid; 1 pound, $1.50, express.

Early Egyptian Blood Turnip (No. 53)

A good forcing variety. Best variety for extra early beets. Leaf, stem and vines dark red, dotted with green. The root is round and flat, with very small tap root. Flesh dark red, zoned with lighter red. It is hard and crisp, and tender only when young. Prices: Packet, 5c; ounce, 10c; ¼ pound, 25c; 1 pound, 80c, postpaid; 1 pound, 75c, express.

Early Eclipse (No. 54)

One of the standard varieties for first early, especially desirable for the home garden. Root round, with small tap. Flesh bright red, zoned with white. Very sweet, tender and crisp, especially when young. Prices: Packet, 5c; ounce, 10c; ¼ pound, 25c; 1 pound, 80c, postpaid; 1 pound, 75c, express.

CROSBY'S EGYPTIAN, Large and early. Good variety (No. 56) 5c 10c 25c 80c 75c 10c 25c 80c 75c 10c 25c 80c 75c
LONG SMOOTH BLOOD RED, Grows deep in ground No. 57) 5c 10c 25c 80c 75c 10c 25c 80c 75c 10c 25c 80c 75c
DETROIT, Second early dark red beet (No. 55) 5c 10c 25c 80c 75c 10c 25c 80c 75c 10c 25c 80c 75c

Swiss Chard (No. 58)

Swiss Chard, or Spanish Beet is prepared for the table like Spinach. Plant the seed early in the spring, and it will quickly make plants from which cuttings can be made all summer. The leaves are broad and are yellowish green, with a large mid-rib which is white and can be prepared like Asparagus. Prices: Packet, 5c; ounce, 10c; ¼ pound, 25c; pound, postpaid, $1.00; pound, express, $1.05.

MANGLES OR STOCK BEETS. 6 to 8 pounds will plant one acre

Culture: Plant in April and May. Soak the seeds 24 hours before planting. Make rows to 2½ feet apart, and sow in drills about one inch deep. Later thin out so that the plants will be 8 inches apart in the rows. Young plants can be transplanted to fill up vacancies. Cultivate as soon after planting as possible. At first frosts dig the roots, cut off the tops, and pile the roots on a well drained plot, cover with straw or cornstalks and about an inch of dirt. Gradually increase the covering as it gets colder. When covered gradually they will not heat. Always feed with some dry roughage.

GOLDEN TANKARD—The best variety of yellow stock beets. The flesh is rich golden yellow in color. The variety is well suited to dairymen. Prices: Ounce, 5c; ¼ pound, 20c; 1 pound, 80c, postpaid; 1 pound, 75c, express. (No. 59).
Mayo's Frost-Proof Cabbage Plants

Will Mature Heads Two to Three Weeks Earlier Than Your Home Grown Plants and Double Your Profits. Why?

There are a number of islands along the Sea Coast of South Carolina, where the soil and climatic conditions are just suited for growing tough, hardy cabbage plants during the Winter and early Spring. The plants make a slow but steady growth, until at eight to ten weeks of age they are very tough and hardy, the buds are purple and the outer leaves a reddish brown. When in this condition they can be shipped to territory farther north and be planted in the open ground a month to six weeks sooner than the home-grown hot bed or cold frame plants. The FROST-PROOF CABBAGE PLANTS will stand a temperature of 20 degrees above zero with injury. The land freezing or the plants being covered with ice, sleet or snow after they are planted will not injure them, providing temperature does not go below 20 degrees above zero.

The top of the plant does not grow until your regular Spring weather opens up, but the roots grow from the time they are planted, and just as soon as spring weather starts, the established root growth assimilates the fertilizer in the soil, the plants grow very fast, maturing headed cabbage two or three weeks sooner than you can mature them from hot bed and cold frame plants. You know what the difference in profit will be if your crop is matured and marketed before the general crop from home grown plants is matured.

TO GET THE ADVANTAGE OF THESE FROST-PROOF CABBAGE PLANTS THEY MUST BE PLANTED A MONTH OR SIX WEEKS EARLIER THAN YOU WOULD PLANT HOME-GROWN PLANTS. WE FILL ORDERS FROM DECEMBER 1st to MAY 1st.

The plants when received will be somewhat wilted and have a hard stunted appearance, which will be disappointing to persons who have never used these plants before. Regardless of appearance, they will produce the crop results.

Prices by Parcel Post, postage paid. In lots of 100, 200, 300, or 400 plants at 50c per 100 plants; 500 plants for $1.00; 1000 or more at $3.00 per 1000 plants.

Varieties: Early Jersey Wakefield, Charleston Large Type
Wakefield, Copenhagen Market, Succession and Early Flat Dutch

Orders are filled by the 100, not 250 or 350. These prices are for even quantities of one variety to package; if you ordered 200 of one variety and 300 of another variety you would pay at the 100 rate.

Prices by Express, buyer paying express charges. In lots of 1,000 to 3,000 plants at $2.00 per 1000; 5000 or more at $1.50 per 1000. Plants packed for express shipment, 1,000 or 2,000 plants of a variety to package, they weigh about 25 pounds per thousand plants, packed for shipment.

Order Early to Get Plants Delivered In Time

When we receive your order for these plants, we have to forward it to our growing station which takes several days. Send your order two to three weeks before you expect to set the plants and you will get them on time.
CABBAGE

Culture: Sow the early varieties under glass in January and February. Later, prick out into flats or frames about 2 inches apart each way. Transplant into open in March in rows 2 feet apart and 20 to 24 inches apart in the rows. For the later varieties, sow in July to Septem-ber. Sow in beds for transplanting or in rows to thin later. Same distance apart as the early varieties.

Insect Remedy: For beetle, apply insect powders while the dew is on. For the green cabbage worm, mix 1 ounce Paris green with 8 pounds Land Plaster and apply after the rain or when the plants are moist from the dew. Hand picking is the only remedy for the spotted cabbage bug. If mustard is planted in the rows, it will draw the bugs from the cabbage and the mustard can be pulled up and burned, destroying the bugs.

CABBAGE—First Early Sorts

Early Jersey Wakefield (No. 62)
The best early variety, very hardy. Head, cone shaped, very solid, and of excellent quality. Leaves are thick and stout. Prices: Packet, 10c; ounce, 25c; ¼ pound, 75c; 1 pound, $2.50, postpaid; 1 pound, $2.45, express.

Charleston or Large Wakefield (No. 63)
Just a little later than the Early Jersey Wakefield. Plants larger, and are of better quality. It is a splendid variety to follow the Early Wakefield. Prices: Packet, 10c; ounce, 25c; ¼ pound, 75c; 1 pound, $2.50, postpaid; 1 pound, $2.45, express.

Early Spring (No. 64)
The plants are vigorous, with short stem. It does not reach its maturity as early as the Jersey Wakefield, but it becomes solid enough for use about as early. It is a good variety where a large flat cabbage is wanted. The head is large and oval. Prices: Packet, 10c; ounce, 25c; ¼ pound, 75c; 1 pound, $2.50, postpaid; 1 pound, $2.45, express.

SECOND EARLY OR SUMMER VARIETIES

Henderson's Early Summer (No. 65)
Early, strong growing plant. Heads large and round. Better keeper than the early varieties. Leaves large and spreading. Prices: Packet, 10c; ounce, 25c; ¼ pound, 75c; 1 pound, $2.50, postpaid; 1 pound, $2.45, express.

Early Dwarf Flat Dutch (No. 66)
The plant is short stemmed, upright growing, and has a few short leaves, thus permitting the rows to be close together. Head, large, oval, nearly round, solid, crisp and tender, maturing at the same time as Early Summer. Prices: Packet, 5c; ounce, 20c; ¼ pound, 60c; 1 pound, $2.05, postpaid; 1 pound, $2.00, express.

LATE OR WINTER VARIETIES

SUREHEAD. Good general crop (No. 71) 10c 25c 75c $2.50 $2.45
RED ROCK. Best red cabbage (No. 72) 10c 30c 90c $3.05 $3.00
DANISH BALL HEAD. Best ball head cabbage (No. 73) 10c 35c 90c $3.05 $3.00
LARGE LATE DRUMHEAD. Head solid and deep (No. 74) 10c 30c 90c $2.05 $2.00
LARGE LATE FLAT DUTCH. Large, oval heads (No. 75) 5c 25c 75c $2.05 $2.00
CAULIFLOWER

One ounce will produce about 3,000 plants

Culture: Strong, loamy soil, neither too clayish nor too sandy. Plenty of manure is needed. Sow seed in hot bed same as cabbage, transplanting into the open during March. Set the plants in rows 2 feet apart and 18 inches apart in the rows. Give liberal applications of water during dry weather. Plants respond to light dressings of commercial fertilizers. When heads are hard they can be blanched by drawing the leaves around the head and tying with raffia or a strip of cloth.

Insect Remedy: See cabbage for insect remedy as the same insects attack both cauliflower and cabbage.

EARLY SNOWBALL (No. 78)

The very best, and earliest maturing variety for this section. It is also the best variety for general crop. The plants are compact, medium sized and solid. Prices: Packet 20c; ¼ ounce, 65c; 1 ounce, $2.00; ½ pound, $7.00; pound, $27.00.

PE-TSAI or Chinese Celery Cabbage (No. 79)

A new vegetable in this country of much promise; first introduced by the Chinese on the Pacific coast. Pe-Tsaï belongs to the Cabbage family and produces quickly from the seed sown in the open ground, very attractive heads similar to Cos Lettuce. Sow the seed early in the Spring, for in hot weather the heads have a tendency to run to seed, and will not head; thin plants out so as to stand about 15 inches apart in the row. The heads blanch readily. The leaves are tender enough to be used for salad; and it can also be boiled like ordinary cabbage, but must be cooked quickly. Prices: Packet, 10c; ounce, 35c; ¼ pound, $1.00, pound, postpaid, $3.55; pound express, $5.50.

WHITLOOF—Chicory or French Endive (No. 80)

Used principally as a Winter Salad. Sow the seed early in the Spring, and thin so as to stand three inches apart in the row. The plants form long roots which are taken up in the Fall and stored in soil in a cool place until wanted for forcing. For forcing the roots should be planted in the open in trenches about eighteen inches deep, or they may be forced in boxes in warm cellar during the Winter. Always plant the roots in an upright position. Prices: Packet, 10c; ounce, 50c; ¼ pound, $1.50.

CARROTS

Ounce will sow 100 feet of drill. 3 to 4 pounds to the acre.

Culture: Loose, warm soil in good mechanical condition. Well fertilized with manure or commercial fertilizers high in potash. Sow in March and April in rows one-half foot apart. Keep the ground free from weeds. In raising for stock make the rows wider apart in order to give room for horse cultivation.

DANVER'S HALF LONG (No. 81)

The best variety for table use. The roots are smooth and handsome, deep orange colored. They are medium length, tapering to a blunt end. Prices: packet, 10c; ounce, 15c; ¼ pound, 35c; 1 pound, $1.25, postpaid; 1 pound, $2.20, express. Pkt. Oz. lb. lb. Post

(No. 84) Improved Long Orange, good keeper...10c 15c 35c $1.00
(No. 83) Guernsdale or Oxheart, good quality...10c 15c 35c $1.00
(No. 82) Chantenay, splendid for table ........10c 15c 35c $1.00

BRUSSELS SPROUTS (No. 85)

A variety of the cabbage family. It is peculiar in the fact that it bears on its stem from 50 to 100 bulbs, resembling miniature cabbage heads. The heads or buds are from one to two inches in diameter, and are very delicious to those who like vegetables of the cabbage family.

Culture: Sow in April and transplant in May.

Prices: Packet, 10c; ounce, 25c; ¼ pound, 75c; 1 pound, $2.50, postpaid; 1 pound, $2.45 express.
Celery

1 ounce of seed will produce 5,000 to 10,000 plants.

Culture: For early summer, sow seeds of self-blanching varieties in flats under glass during February. Later stick out into other flats in the open. In April and May set the plants out in very rich and well prepared land in rows 3 to 4 feet apart and 6 inches apart in the rows. Give good cultivation. For late and winter celery, sow the seed of standard varieties either in flats or directly in the open ground. If sowing in the open, make the rows for plants one foot apart and sow the seed shallow. Then transplant into rows four feet apart. Blanch by gradually banking the soil to within a few inches of the top of the leaves.

Golden Yellow Self-Blanching (No. 86)

This is the best celery for early use. Plants yellowish green in color, but as they mature the inner stems and leaves turn golden yellow. Therefore, the blanching does not take much time or extra labor as in the other varieties of celery. It is, when matured, of fine color, very tender, and of fine flavor. Prices: Packet, 10c; ounce, 70c; ¼ pound, 60c; 1 pound, $2.05, postpaid; 1 pound, $7.00, express.

White Plume (No. 87)

We do not think this will compare favorably with the Golden Yellow Self-blanching; however, on some markets, it is a favorite. Prices: Packet, 10c; ounce, 15c; ¼ pound, 60c; 1 pound, $2.05, post paid; 1 pound, $2.00, express.

Giyan Pascal (No. 88)

Splendid variety for fall and winter use. It blanches to a yellowish white color, and is solid, crisp, and of fine flavor. The stalk is thick, round in the middle, but broadening at the base. Prices: Packet, 10c; ounce, 15c; ¼ pound, 60c; 1 pound, $2.05, postpaid; 1 pound, $2.00, express.

Endive

One ounce will produce 300 feet of row. Culture: Same as lettuce.

Moss Curled (No 97)

Prices: Packet, 10c; ounce, 35c; ¼ pound, 70c.

Mustard

One ounce will sow 200 feet of drill. Two pounds to the acre.

Culture: Sow either broadcast or in drills one foot apart. If sown in drills thin out after some time to one foot apart.

Southern Giant Curled (No. 93)

The best variety for the South. Leaves are light green, frilled and much crimped. Prices: Packet, 5c; ounce, 10c; ¼ pound, 25c; 1 pound, 75c; postpaid; 1 pound, 70c, express.

Okra

Long Green: Medium height, bearing a large crop of white, smooth pods, which retain their tenderness for a long time. Prices: Packet, 5c; ounce, 10c; ¼ pound, 20c; 1 pound, 65c, postpaid; 1 pound, 60c, express. (No. 94).

White Velvet—Prices: Packet, 5c; ounce, 10c; ¼ pound, 25c; 1 pound, 75c, postpaid; 1 pound, 70c, express. (No. 95).

Leek

Culture: Sow in March and April in drills one foot apart, and one inch deep. Transplant into good rich soil when the plants are six to eight inches high. For blanching cut and bank like celery.

Large American Flag (No. 96)

Prices: Packet, 10c; ounce, 35c; ¼ pound, 70c.

Collards

One ounce will produce about 3,000 plants.

Culture: Same as cabbage.

Prices: Packet, 5c; ounce, 10c; ¼ pound, 25c; 1 pound, 75c, postpaid; 1 pound, 70c, express. (No. 90)

Cress

Fine Curled—Pepper Grass (No. 91)

Prices: Packet, 5c; ounce, 15c; ¼ pound, 35c; 1 pound, $1.05, postpaid; 1 pound, $1.00, express.

Water Cress (No. 92)

Prices: Packet, 10c; ounce, 60c; ¼ pound, $1.65.
CORN

One Pound, 100 hills, or 150 to 250 feet of row. Culture: Plant in April, May and June. For succession plant every two weeks till August.

ROASTINGEAR CORNS

Extra Early Adams (No. 100)

The earliest variety of corn for this section of the country. Not a sweet corn, but it produces small, short ears, well filled with tender white grains. Matures for roastingears in about 70 days. Prices: postpaid, packet, 10c; ½ pound, 20c; 1 pound, 30c; 2 pounds, 50c. Not postpaid, 10 pounds, $1.50.

Early Adams (No. 101)

Slightly larger and matures a few days later than the Extra Early variety. Prices: postpaid, packet, 10c; ½ pound, 20c; 1 pound, 30c; 2 pounds, 50c. Not postpaid, 10 pounds, $1.50.

Improve Early Adams (No. 102)

Very much larger than the extra early sorts. Matures for roastingears in about 80 days. Prices: postpaid, packet, 10c; ½ pound, 20c; 1 pound, 30c; 2 pounds, 50c. Not postpaid, 10 pounds, $1.50.

Mayo's Best Early Roastingear (No. 103)

Only about three days later than Adams Early, but far larger and better corn. The shucks grow so tight to the end of the ear as to exclude the corn worm, which is very disastrous to the early varieties. This will remain tender for roastingears longer than any of the other varieties. We introduced this on the Knoxville market many years ago, and it has not been equaled by any other introductions. Three to five ears to the stalk. Prices, Postpaid, packet, 10c; ½ pound, 20c; 1 pound, 30c; 2 pounds, 50c; not postpaid, 10 pounds, $1.50; 100 pounds, $15.00.

These varieties mature about the same time. They are not sweet corns. Key mature for roastingears in 100 to 120 days.

Country Gentleman (No. 107)

Small white cob, thickly covered with irregular rows of long, slender white grains of splendid quality. This is one of the very best varieties of sugar corn. Ears are seven to nine inches long. Matures with the medium varieties of sugar corn. Prices: Postpaid, Packet, 10c; ½ pound, 25c; 1 pound, 40c; 2 pounds, 70c; not postpaid, 10 pounds, $2.00; 100 pounds, $19.00.

MAYO'S GOLDEN GIANT (No. 98).

This variety is a cross between the Golden Bantam and the Howling Mob Corn. It is as early as the Golden Bantam, and the ears are much larger. This is a golden sweet corn which grows to a good sized ear. It is a very sweet, and a good yielder. Prices: Postpaid, packet, 10c; ½ pound, 25c; 1 pound, 40c; 2 pounds, 70c. Not postpaid, 10 pounds, $2.00.
Country Gentleman Corn

Corn, Sugar Varieties—(Continued)

Stowell’s Evergreen (No. 109)

Good main crop variety. It is hardy and productive, very tender and sweet, and remains in this condition for a long time. Ears about eight inches long, sixteen or eighteen rowed. Stalks grow to a good size. Prices: postpaid packet, 10; ½ pound, 25c; 1 pound, 40c; 2 pounds, 70c; not postpaid, 10 pounds, $2.00; 100 pounds, $20.00.

GOLDEN BANTAM (No. 108)

Every home garden should include some of this superb corn. It is without a doubt the sweetest and richest flavored corn known. True the ears are small, but the quality is wonderful, and is very tender. The corn is vigorous growing, producing ears of eight rows and about five inches long. The grain is broad, and a rich golden color. Remember that this is a sugar corn, and should not be confused with the yellow field corn of this section. Prices: Postpaid, packet, 10c; ½-pound, 25c; 1 pound, 40c; 2 pounds, 70c; not postpaid, 10 pounds, $2.00.

Pop Corn

(Qno. 115) Queen’s Golden, packet, 10c; 1 pound, 35c.

Market Gardeners: We make a specialty of supplying good dependable Roastingear corn for truckers. This is usually a good paying crop. Write us for special prices on larger quantities than quoted in our catalog.

Kale

One ounce will produce 5,000 plants.

Culture: Same as mustard. Sow in October, February and March.

Greens form a most important part of any balanced diet. In these strenuous times, we should all eat more greens. Greens are rich in mineral, which is necessary in the building and making of the body. Plant and eat more greens. Kale is one of the easiest greens to grow. It makes a splendid and most palatable dish.

Siberian (No. 117)

Large bullish green leaves, smooth in the center, but frilled at the edge. Very hardy. Prices: packet, 5c; ounce, 10c; ¼ pound, 30c; 1 pound, $1.00, postpaid; 1 pound, 95c express.

Kohl Rabi

One ounce will sow about 300 feet of drill. Culture: Drill and cultivate the same as spring turnips.

Early White Vienna (No. 119)

Very early with small tops. Bulbs medium sized, white and of fine quality. Prices: Packet, 10c; ounce, 30c; ¼ pound, 85c; 1 pound, $3.05, postpaid; 1 pound, $3.00, express.
Cucumbers

One ounce will plant 50 hills. 2 lbs. will plant 1 acre.

Culture: Any good soil will answer. Plant in hills 4 to 6 feet apart each way, and later thin out to four of the strongest plants to the hill. Put 6 to 12 seeds to the hill. Keep the fruit picked just before they ripen, whether needed or not, for, if left to ripen on the vines, it will stop the production. Like all vine crops, cucumbers require moist, warm soil. Plant in the latter part of April or May. Plant at intervals for a succession. Spray with Bordeaux Mixture when vines are in danger of beetles or bugs.

Green Prolific (No. 125)

Very prolific, largely planted for pickles. The fruit is four to five inches in length. Has no equal for use as medium sized pickles. Prices: packet, 5¢; ounce, 10¢; ¼ pound 30c; 1 pound, $1.05, postpaid; 1 pound $1.00, express.

Early Cluster (No. 126)

Produces slim fruits very desirable for small pickles. It often bears in clusters. Prices: packet 5¢; ounce 10¢; ¼ pound, 80c; 1 pound, $1.26, postpaid; 1 pound, $1.20, express.

Improved Long Green (No. 127)

Vines vigorous and productive, forming fruit for the table use nearly as early as the short sorts. Fruit about 12 inches long, firm and crisp. Fine for pickles and table use. The mature fruits are sometimes splendid dark purple. Price: packet, 10¢; ounce, 20¢; ¼ pound, 30c; 1 pound, $1.50, postpaid; 1 pound, $1.50, express.

Early Fortune Cucumber (No. 128)

This Cucumber is of the "White Spine" type. The Cucumbers are somewhat longer than the Arlington White Spine, cylindrical in shape, and very dark green skin, with crisp flesh, which is tender and crisp. The vines are strong growing, which enables it to withstand blight and bring fruit to full size. This is one of the best varieties of Cucumbers which has been introduced in years. Prices: packet, 10¢; ounce, 15¢; ¼ pound, 40¢; 1 pound, $1.25, postpaid; 1 pound, $1.20, express.

Arlington White Spine (No. 129)

The cucumbers are very regular in outline, uniform in size, averaging seven to eight inches in length, straight and of a rich dark green color. Flesh white, crisp and solid, with comparatively few seeds. Vines are of vigorous growth and productive. We regard this as the very best variety for table use. Prices: packet, 10¢; ounce, 20¢; ¼ pound, 50¢; 1 pound, $1.25, postpaid; 1 pound, $1.20, express.

Japanese Climbing (No. 130)

Stands heat of summer very well. Early ripening. Prices: packet, 10¢; ounce, 20¢; ¼ pound, 50¢; 1 pound, $1.50, postpaid; 1 pound, $1.55, express.

Egg Plant

One ounce will produce 1,000 to 2,000 plants.

Culture: Sow in hot beds in February. Pot in small pots and bury the pots in the garden. Plant out of the pots in the latter part of April or the first of May. Egg plant seed require a high temperature in which to germinate. Do not transplant into the open ground until warm weather has thoroughly set in. Allow 3 feet between rows and 2 feet apart in row.

Insect Remedy: For cut worm, use poisoned bran or poisoned cottonseed meal and wrap paper around plants when setting out. For the potato bug, use same remedies as for potatoes.

New York Improved Purple Spineless (No. 131)

A general favorite both for the market and home use. Plants large, spreading; foliage light green; fruit very large, oval; color splendid dark purple. Plants usually produce four to eight large fruits. Prices: Packet, 10¢; ounce, 40¢; ¼ pound, $1.50; 1 pound, $5.00, postpaid; 1 pound, $4.95, express.

Black Beauty (No. 132)

Earlier than the New York Spineless by ten days. It is not quite as large. Fruit large and symmetrical in shape and of a dark purple color. Prices: Packet, 10¢; ounce, 40¢; ¼ pound, $1.50; 1 pound, $5.00, postpaid; 1 pound, $4.95, express.
New York Head Lettuce (No. 136)

During the last year or so through error this splendid variety has been called "Iceberg Lettuce." The real "Iceberg" Lettuce is much inferior to the New York, having smaller heads which are not as compact as the genuine New York lettuce. California has been shipping train loads of New York Lettuce to the eastern markets and through this error it is called "Iceberg." We have discontinued Iceberg so as to eliminate this error as far as possible.

New York head lettuce produces immense heads often 15 and 16 inches across. The interior is beautifully blanched, creamy white, crisp, tender and delicious, being free of bitterness. The plant is large, robust growing, rooting deeply, and resists hot weather well. Prices: Packet, 10c; ounce, 20c; ¼ pound, 60c; 1 pound, $2.00 postpaid; 1 pound, $1.95, express.

Curl or Loose Leaved Varieties

The curled or Loose Leaved varieties of Lettuce do not require transplanting. Just sow in the row and pluck out as needed. The Curled Lettuce is the proper variety to use in the home garden for late planting, where one has not the time to start the head lettuce plants early for transplanting.

Grand Rapids (No. 138)

This is the best variety for greenhouse forcing. It is of quick growth, little liable to rot and remains in good condition several days after being fit to cut. The plant is upright, and forms a loose cluster of large, thin, bright green leaves, decidedly crimped. This stands shipping well. Prices: packet, 5c; ounce, 20c; ¼ pound, 50c; 1 pound, $1.50, postpaid; 1 pound, $1.45, express.

Black Seeded Simpson (No. 139)

The best variety for sowing out of doors where a loose leaf sort is needed. Leaves are slightly ruffled, and even the outer ones are very tender and crisp. Remains in good condition for a long time. Prices: Packet, 5c; ounce, 25c; ¼ pound, 50c; 1 pound, $1.50, postpaid; 1 pound $1.45, express.
MAYO'S MUSKMELON COLLECTION NO. 151

For 25c we will send you postpaid, the following:
1 Pkt. Mayo's Rocky Ford Muskmelon
1 Pkt. Burrell's Gem Muskmelon
1 Pkt. Mayo's Tip Top Muskmelon
1 Pkt. Mayo's Banana Muskmelon

Value 35c, our price 25c.

MAYO'S MUSKMELON COLLECTION NO. 149

For only $3.00, we will send you postpaid, the following:
1 Pound Mayo's Rocky Ford Muskmelon
1 Pound Mayo's Emerald Gem Muskmelon
1 Pound Mayo's Tip Top Muskmelon

$3.80 for only $3.00

MAYO'S MUSKMELON COLLECTION NO. 150

For only $1.25 we will send you postpaid, the following:

\[
\begin{align*}
\frac{1}{4} \text{ lb. Mayo's Rocky Ford Muskmelon} & \ldots .30 \\
\frac{1}{4} \text{ lb. Banana Muskmelon} & \ldots .35 \\
\frac{1}{4} \text{ lb. Mayo's Tip Top Muskmelon} & \ldots .40 \\
\frac{1}{4} \text{ lb. Pollocks, No. 10-25, Muskmelon} & \ldots .50 \\
\end{align*}
\]

Value, $1.55. Our price $1.25.

Every garden should include a good planting of Muskmelons. Mayo's Muskmelons are famous for the good quality which melons from our seed always have. Do not fail to plant Mayo's Muskmelon seed this year.
MUSKMELON

One ounce will plant 50 hills. 2 to 3 pounds in hills to the acre
Mayo's Muskmelon Seeds

For more than 40 years Mayo's Muskmelon Seeds have been the real standard of the Knoxville Market. Our Melon Seeds are grown especially for us. It is not just an accident that Mayo's Melon Seeds have given universal satisfaction for many years. This represents the service which we have given to our customers year in and year out for almost a half century.

Culture: Light rich soil. Plant in hills 5 to 6 feet apart in May, waiting until the ground has become warm and dry. Plant 12 to 15 seeds to the hill and later thin out to three or four of the strongest plants to the hill.

Previous to planting mix about three shovelfuls of well rotted manure in each hill.

Insect Remedy: Dust with sifted ashes or land plaster to keep off the insects. Spray with Bordeaux mixture to prevent disease.

Rocky Ford or Netted

The most popular small melon. The fruit is oval, slightly ribbed, densely covered with a fine netting. Flesh thick, green, and highly flavored. The seed cavity is small. Prices: Packet, 5c; ounce, 15c; ¼ pound, 30c; 1 pound, $1.00, postpaid; 1 pound, 95c, express. 10 pounds or over, 75c pound.

Mayo's Emerald Gem

The favorite on the Knoxville market. We think that this is the best variety where a small to medium size of salmon-fleshed melon is required. During the season these predominate on the local market. Vines of strong, vigorous growth and very prolific. If the fruits are gathered as they mature the vines will continue bearing throughout the season. The melons are about the same size as the Rocky Ford. The skin is rich emerald-green colored, smooth and free from netting. The fruits are heavy ribbed. The flesh is very thick, with thin rind, and small seed cavity, and of a rich salmon color. Prices: Packet, 5c; ounce, 15c; ¼ pound, 50c; 1 pound, $1.50, postpaid; 1 pound, $1.45, express. 10 pounds or over, $1.25 per pound.

BURREL'S GEM (No. 142)

Similar on the outside to the Rocky Ford. However, the ends slope sharply. The flesh is orange-salmon colored, and of fine flavor. Prices: Packet, 10c; ounce, 20c; ¼ pound, 50c; 1 pound, $1.50, postpaid; 1 pound, $1.45, express. 10 pounds or over, $1.25 per pound.

POLLOCK'S NO. 25 MUSK MELON (No. 144)

Similar to the Rocky Ford in shape and outside appearances. It is just as hardy as the Rocky Ford and is a good producer. This variety has recently been in great demand on the Knoxville market. The flesh is salmon tinted, and is of delicious flavor. Prices: Packet, 10c; ¼ pound, 50c; 1 pound, $1.55, postpaid. 1 pound, $1.50, express. 10 pounds or over, $1.25 per pound.
MUSKMELON—(Continued)

Mayo’s Tip Top Muskmelon (No. 145)

Mayo’s Tip Top Muskmelon is the best large sized Muskmelon. It is very productive, large sized, nearly round, and partly covered with a shallow netting. Flesh is deep yellow in color and of fine flavor.

Prices: Packet, 10c; ounce, 20c; ¼ pound, 50c; 1 pound $1.55, postpaid. 1 pound, $1.50, express.

Take care of your melon vines. Many a Good crop of melons has been ruined by bugs and blight just when they were about ready to mature. Spray the young vines with Bordeaux Mixture, and later spray with Bordeaux Arsenate. These are effective remedies for the insect pests. For prices see Insect Remedies.

Banana Muskmelon (No. 148)

Shaped and flavored like the banana. Melon grows 18 to 30 inches long and 2 to 5 inches in diameter. Stands summer heat well. Popular for the home and market garden. Usually commands a premium on the market. The flesh is thick and rich orange in color, of delicious flavor. Prices: Packet, 10c; ounce, 20c; ¼ pound, 50c; 1 pound, $1.50, postpaid; 1 pound, $1.45, express.

Mayo’s Eden Gem (No. 146)

A vigorous grower, and resists rust. The netting is very dense. Deep green flesh. Larger and rounder than the Rocky Ford, and denser netted. Splendid flavor. During the last few years this has become quite a favorite on the Knoxville Market. Prices: Packet, 10c; ounce, 20c; ¼ pound, 50c. Pound, postpaid, $1.60. Not postpaid, pound, $1.55.

Honey Dew Melon (No. 147)

Melons smooth with almost white rind. They measure about six inches in diameter by seven to eight inches long. The flesh is green and thick, with a peculiar sweet taste somewhat resembling in flavor a well ripened banana. Gather as soon as they slip from the vine and store in a cool place a few days before serving, as they are at their best when a trifle over ripe.

Prices: Packet, 10c; ounce, 20c; ¼ pound, 50c; 1 pound, $2.00, postpaid; 1 pound, $1.95.

Early Hackensack (No. 143)

Melons of good size, heavily ribbed and netted; thick light green flesh of fine flavor. Prices: Packet, 5c; ounce, 15c; ¼ pound, 40c; 1 pound, $1.30, postpaid; 1 pound, $1.25, express.
Watermelon

One ounce will plant 25 hills. 3 pounds to the acre. **Culture:** Same as muskmelon.

**Insect Remedy:** Spray with Bordeaux Mixture and Bordeaux Arsenate.

**ALABAMA SWEET**—Very large, long melon of good quality. Good shipper; deep green with irregular striping. Rind firm, flesh bright red, seed white. **Prices:** Packet, 5c; ounce, 10c; ¼ pound 25c; 1 pound, 80c, postpaid; 1 pound, 75c, express. (No. 155)

**Florida Favorite**—An extra early, good sized splendid quality melon. Long, dark green, irregularly striped with lighter green. Flesh bright crimson color, and very delicious in taste. **Prices:** Packet, 5c; ¼ pound, 25c, 1 pound, 75c, postpaid; 70c pound, express. (No. 160).

**Georgia Rattlesnake**—A long, light green striped melon of splendid quality. Medium early. Flesh crimson and of fine flavor. **Prices:** Packet, 5c; ounce, 10c; ¼ pound, 25c; 1 pound, 80c, postpaid; 1 pound, 75c, express. (No. 162).

**Mayo's New Perfection Watermelon (No. 167)**

This is the best combination watermelon for shipping and for home use. The melons belong to the large type and will grow to sizes of 50 pounds to 75 pounds. It is oval in shape. The rind is dark, glossy green in color, thin, but very tough. The unusually tough rind will stand a great deal of rough treatment without damage. The tough rind keeps the flesh good and fresh for a week or ten days after ripening which prolongs the marketing period much longer than most ordinary melons. This is an intermediate ripening melon. It is neither early or late, coming on about the average date of most melons. The meat is of dark red color, very sweet, free from fiber or strings. The seeds are large white in color. The splendid quality of the meat, large size melon and long keeping qualities are the outstanding features of the melon. **Prices:** Packet, 10c; ounce, 15c; ¼ pound, 35c; 1 pound, $1.05, postpaid; 1 pound, $1.00 express.

---

**Monte Cristo or Kleckley Sweet (No. 156)**

Very similar to the Halbert's Honey. Oval shape, skin very dark green. Flesh crimson, and of splendid quality. Rind thin, but tough enough to stand shipment. Seed white. **Prices:** Packet, 10c; ounce, 15c; ¼ pound, 25c; 1 pound, 80c, postpaid; 1 pound, 75c, express.

---

**MAYO'S IRISH GRAY (No. 166)**

Melons are whitish gray, long shaped, often growing to a weight of forty pounds. The rind is tough, seed white, and flesh is bright red. Very productive. Melons sold well wherever offered during last few years. Splendid shipper. **Prices:** packet, 10c; ounce, 15c; ¼ pound, 25c; 1 pound, 80c postpaid; 1 pound, 75c, express.

---

**EXCEL (No. 167)**

This is a hybrid melon, as a result the seed are black with a slight mixture of white seed. Melon is quite a favorite in the South. Melons long. Flesh red. Rind dark green. **Prices:** Packet, 5c; ounce, 10c; ¼ pound, 25c; 1 pound, 80c, postpaid; 1 pound, 75c, express.
WATERMELON—(Continued)

Halbert's Honey—More uniform in shape than the Kleckley Sweet. The melons average 18 to 20 inches long, and are full or bluntly rounded at both ends. Skin dark glossy green. Flesh crimson, and has good color and flavor clear to the thin rind. Owing to the thin rind this variety does not stand shipment as well as the Kleckley Sweets. Prices: Packet, 5c; ounce, 15c; ¼ pound, 35c; 1 pound, $1.05, postpaid; 1 pound, $1.00, express. (No. 157).

Mayo’s Genuine Tom Watson Watermelon—Our special strain saved from the large, sweet melons that are grown exclusively for critical growers. This watermelon is truly a splendid variety for home use or for shipping purposes. It is extra long, uniform in shape, dark green in color, and is of splendid eating qualities. It has a tough, medium thick rind, and will stand hauling or shipping splendidly. Prices: Packet 10c; ounce, 15c; ¼ pound, 25c; 1 pound, 80c, post-express. (No. 169).

Thurmond Grey Watermelon—This variety is very popular as a shipping melon. Somewhat similar to the Irish Grey. The rind is thin and tough. It is of light green or greyish green in color. The flesh is free from strings, and is very crisp and tender. The rind is somewhat more mottled than the Irish Grey. The seeds are brown in color. A great many markets pay a premium for this particular kind of melon. It is splendid for a medium or late crop. Prices: Packet, 10c; ounce, 15c; ¼ pound, 40c; 1 pound, $1.25, not postpaid; 1 pound, $1.20; 5 pounds, and over, $1.00 per pound. (No. 170).

Stone Mountain Watermelon—This wonderful melon averages weight from 50 to 80 pounds on good melon soil. It is very sweet and delicious. For home use and for nearby market gardening use this is one of the best melons. It is round or square shape, rich dark green color, medium thickness of rind, rich scarlet flesh. It has very few seeds, is solid through and is almost all heart. It is very prolific and stands up well under trying conditions. It is especially adapted for a medium and late crop. The rind is rather tender and for this reason this melon will not stand shipping a great distance. Prices: Packet, 10c; ounce, 15c, ¼ pound, 50c, 1 pound, $1.55, postpaid; 1 pound, $1.50, express. (No. 167).
Onion Sets

Culture: Plant in rows wide enough apart for good cultivation, or about 6 inches apart in the rows. Plant just as soon as the ground can be worked in the Spring. Give close cultivation.

For bunching onions, plant Yellow Potato Onions or White Multipliers in October and November. For the earliest bunching table onions, plant large Yellow Danver Onions, grown from sets in September and October.

Potato Onion Sets. Also known as the Hill Onion. This variety does not make seed. The sets are grown by planting the large onions which produce a large cluster of sets. These sets produce the large, well known Potato onion which is of excellent flavor and splendid for green bunching onions. On account of this variety not going to seed, it is splendid for spring planting in the South. Prices: 1 pound, 50c, postpaid; 1 pound, 45c. express. Crop short.

White Multiplier Onion Sets. Pearly white in color. Does not grow as large as the Potato Onion. Does not go to seed. The sets are grown from the large onions. It is very mild in flavor. Good for pickling and splendid for bunching onions. Prices: 1 pound, 25c, postpaid; 1 pound, 20c, express.

Yellow Danver Onion Sets. The popular yellow sets grown from seeds. Produce good sized onions. They mature a good large onion before the seed stalk appears. Prices: 1 pound, 35c, postpaid; 1 pound, 30c, express.

Large, Red Weathersfield Onion Sets. The sets are grown from seed and make good sized onions. Prices: 1 pound, 35c, postpaid; 1 pound, 30c, express.

The market changes are very rapid on these; so in order to give you a fair advantage, we would like for you to write us for prices where you need quantities larger than we are quoting. We handle an immense quantity of these, and are always prepared to make you close prices on Strictly First-Class Onion Sets.

Onion Seed

One ounce of seed for 200 feet of drill. 4 to 5 pounds of seed to the acre.

Culture: For large onions, sow seed in cold frames in the latter part of January or the first part of February for transplanting into the open later on. Sow outside in March and April. Have good, loamy, sandy soil. For sets sow at the rate of 50 pounds to the acre on light sandy soil in August.

Large Red Weathersfield (No. 184)

Bulb large, flat and thick; skin deep purple red; flesh purplish white, moderately grainy and rather strongly flavored. Very productive and a good keeper. Prices: packet, 10c; ounce, 75c; 1/4 pound, $2.00; 1 pound, $7.50, postpaid; 1 pound, $7.45, express.

Yellow Globe Danvers (No. 185)

Best color, and largest yielder of any yellow onion. The bulbs are large and round, with very small necks. Rich orange-yellow color. Splendid keeper. Prices: Packet, 10c; ounce, 75c; 1/4 pound, $2.00; 1 pound, $7.50, postpaid; 1 pound, $7.45, express.

Prizetaker (No. 186)

Very large, handsome, and nearly round in form. Skin, yellowish brown; flesh white, mild and tender. This is one of the European varieties. If started in hot beds, it will produce a large onion the first season. Prices: Packet, 10c; ounce, 75c; 1/4 pound, $2.00; 1 pound, $7.50, postpaid; 1 pound, $7.45, express.

ONION PLANTS

These plants are started early in the South from seed. In this section it is oftentimes hard to get onion seed planted early enough. Mayo’s Onion Plants are perfectly hardy withstanding more cold than Frost Proof Cabbage Plants. They hold up well in shipping and will start growing as soon as they are planted. These plants will produce green and mature onions quicker than onion sets.

Mayo’s Onion Plants Postpaid

Mayo’s Prizetaker Plants and Mayo’s Bermuda Onion Plants. Prices 100 plants of one variety, 50c, postpaid. (No. orders filled for less than 100 of each variety; 500 onion plants all of same variety, $1.60, postpaid. 1000 or more plants of same variety, $3.00 per 1000 or more plants at $2.00 per thousand, postpaid. Our onion plants are shipped direct from our growing stations in the South, and for this reason they will be shipped separate from your seed orders. Send your orders for plants in early, remember that it takes several days after we receive your order for plants to send your order to our growing station, and get the plants delivered to you.

24
Garden Peas

One Pound will plant 50 feet of drill... 100 pounds to the acre.

Culture: Plant the early or smooth varieties in February. Plant the sugar or wrinkled varieties from February to May in accordance with the season. The late varieties must be stuck on poles. Plant in furrows three or four inches deep and have the furrows three feet apart. Cultivate like corn.

EXTRA EARLY GARDEN VARIETIES

Mayo’s First and Best (No. 188)

Just a day or so earlier than the Alaska. Vines hardy and productive, and are from 2½ to 3 feet high, bearing three to seven pods, each containing five to seven medium sized peas of good quality. The seed are small sized, smooth, yellowish white. Matures practically the whole crop at the same time. Prices: Postpaid packet, 10c; ½ pound, 20c; 1 pound, 40c; 2 pounds, 75c; not postpaid, 10 pounds, $1.70; 100 pounds, $15.00.

Alaska (No. 189)

Grows very similar to the First and Best. This variety is largely used by canners. Very early, and matures practically the whole crop at the same time. Seed small, smooth and bluish-green in color. Prices: Postpaid packet, 10c; ½ pound, 25c; 1 pound, 40c; 2 pounds, 75c; not postpaid, 5 pounds, 90c; 10 pounds, $1.60; 100 pounds, $15.00.

Thomas Laxton—An Extra Early Wrinkled Variety (No. 190)

This plant is hardy, producing many extra large size pods. Similar to the Gradus but more productive. The green peas are very large and of fine quality. Prices: Postpaid, packet, 10c; ½ pound, 25c; 1 pound, 45c; 2 pounds, 80c; not postpaid, 10 pounds, $1.80; 100 pounds, $16.00.

Laxtonian Pea (No. 191)

Grows about 18 inches high. Vines make a vigorous growth which enables them to withstand the weather conditions. The Podded variety is filled out with yellow peas which have an excellent flavor. Prices: Postpaid, packet, 10c; ½ pound, 25c; 1 pound, 45c; 1 pounds, 80c; not postpaid, 10 pounds, $2.20.

Nott’s Excelsior (No. 192)

The best early dwarf, wrinkled pea. The vines are larger and more productive than the American Wonder. The seed are wrinkled, very tender and sweet. Prices: postpaid, packet, 10c; ½ pound, 25c; 1 pound, 40c; 2 pounds, 70c; not postpaid, 10 pounds, $2.00.

SECOND EARLY VARIETIES

Telephone (No. 193)

Vines about four feet high, and very vigorous, producing an abundance of very large pods filled with immense peas, which are tender, sweet, and of fine flavor. It begins bearing soon after the Notts Excelsior, and it is a splendid variety for either home or market use. Prices: Postpaid packet, 10c; ½ pound, 25c; 1 pound, 45c; 2 pounds, 70c; not postpaid, 10 pounds, $2.00.

Champion of England (No. 194)

Vines very strong, and about four to five feet high. Seed light green and much shriveled. This is one of the richest and best flavored peas on the market. Pods are large, and well filled with peas of delicious flavor. Prices: postpaid, Packet, 10c; ½ pound, 25c; 1 pound, 45c; 2 pounds, 70c; not postpaid, 10 pounds, $2.00.

Parsley. Champion Moss Curled (No. 198)

The best variety for this section. Handsome, compact growing with densely curled leaves of deep green color. Prices Packet, 5c; ounce, 15c; ¼ pound, 30c; 1 pound, $1.00, postpaid; 1 pound 95c. express.

Parsnip. Hollow Crown or Sugar (No. 199)

Very tender white root, with smooth clear skin. Prices: Packet, 10c; ounce, 15c; ¼ pound, 35c; 1 pound, $1.00, postpaid. 1 pound 95c. express.
Pumpkin

One ounce for 25 hills. One gallon to the acre.

Culture: Garden varieties—Sow in March and April in hills 8 feet apart; six or eight seed to the hill, and later thin out to two plants in each hill. Field varieties—Plant in hills 10 feet apart, and if planted in corn plant at same time as corn in hills ten feet apart.

Striped Cushaw, or Tennessee Sweet Potato (No. 195)

Skin stripped with mottled green bands of white. Rich yellow meat, tender and of fine flavor. Prices: Packet, 5c; ounce, 15c; ¼ pound, 40c; 1 pound, $1.25, postpaid; 1 pound, $1.20, express.

Kentucky Field (No. 197)

The standard variety of Field Pumpkins. These are quite generally planted for field crops throughout this section. This is one of the best keeping varieties known. It is suitable for table use as well as stock feeding. This variety is particularly adapted to the South. It is the best variety for extra large fruits of splendid quality. Skin mottled light green and yellow, changing to a creamy yellow when they mature. Flesh yellow, tender and of excellent quality. Prices: Packet, 5c; pound, 35c, postpaid; pound 25c, express.

Pepper

One ounce of seed for 1,000 to 1,500 plants

Culture: Sow the seed under glass about the last of February. When the plants are two or three inches high remove to larger flats 2 inches apart each way. Transplant into rich open ground as soon as all danger of frost is over. Make transplanted rows two to three feet apart, and 15 to 18 inches apart in the rows.

Ruby King (No. 171)

Plants grow two feet high, and bear a crop of fine, extra large, scarlet peppers. The flesh is thick, sweet, and very mild. Good for mangoes. Prices: Packet, 10c; ounce, 35c; ¼ pound, $1.25; 1 pound, $4.00

ROYAL KING (No. 172)

Similar to the Ruby King, but somewhat larger and more uniform in growth. Prolific, bright and glossy. Mild in flavors. Prices: Packet, 10c; ounce, 35c; ¼ pound, $1.25— pound, $5.00.

BULL NOSE or LARGE BELL (No. 173)

A good variety, but of late years has a tendency to run hot. Prices: Packet, 10c; ounce, 35c; ¼ pound, $1.25; pound, $4.00.

RUBY GIANT (No. 174)

Large and very mild. Splendid for Market or Home Gardens. Good yielders. Prices: Packet, 10c; ounce, 35c; ¼ pound, $1.25; pound, $4.00

Chinese Giant (No. 175)

The largest mild red pepper. Larger than the Ruby King. Plants grow to about two feet high, and are well stocked with crimson peppers. A trifle later than the Ruby King. Peppers are large, sweet and mild. Prices: Packet, 10c; ounce, 50c; ¼ pound, $1.60; 1 pound, $6.05, postpaid; 1 pound, $6.00, express.

Long Red Cayenne (No. 176)

Slender, twisted and pointed pod about four inches long. Bright red when ripe. Very strong, hot flesh. Prices: Packet, 10c; ounce, 45c; ¼ pound, $1.50; 1 pound, $5.05, postpaid; 1 pound, $5.00, express.
Radish

One ounce will sow 100 feet of drill

Culture: Sow early and often. Summer radishes mature in 4 to 6 weeks from planting. Plant in rows one foot apart, and sow the seed thick enough to require thinning. Sow the winter varieties in August.

Mixed Radish Seed (No. 202)

Where only a small space is to be planted in radishes, we have our special mixture of several different sorts. The earliest varieties can be used as they mature. This is a splendid arrangement for the home garden, for if you plant a large space in one of the earlier radishes they mature quickly and become pithy. Prices: Packet, 5c; ounce, 10c; ¾ pound, 25c; 1 pound, 75c, postpaid; 1 pound, 70c, express.

Early Scarlet Turnip (No. 203)

Small top, quick growth, mild and crisp. Prices: Packet, 5c; ounce, 10c; ¼ pound, 25c; 1 pound, 75c, postpaid; 1 pound, 70c, express.

Early Scarlet Turnip, White Tipped (No. 204)

The best variety of early turnip radishes. A trifle later than the Early Scarlet Turnip. Roots slightly flattened in the underside; color deep scarlet with a distinct white tip. Flesh white and of fine quality. Prices: Packet, 5c; ounce, 10c; ¼ pound, 25c; 1 pound, 75, postpaid; 1 pound, 80c, express.

Vick’s Scarlet Globe (No. 205)

One of the most popular of all the turnip rooted radishes. It is of quick growth, small leaves and fine quality. Prices: Packet, 5c; ounce, 10c; ¼ pound, 35c; 1 pound 75c, postpaid; 1 pound, 70c, express.

Early Long Scarlet, Short Top (No. 208)

Roots long, slender, and of fine coloring. Ready for use in about 25 days; are crisp, brittle and of fine flavor. They grow half out of the ground, and reach a length of five or six inches. Prices: Packet, 5c; ounce, 10c; ¼ pound, 85c; 1 pound, 85c, postpaid; 1 pound, 85c, express.

Long White Icicle (No. 209)

The best medium white radish. Roots are long, pure white, and of splendid flavor. Prices: Packet, 5c; ounce, 10c; ¼ pound, 25c; 1 pound, 75c, postpaid; 1 pound, 70c, express.

Early White Giant Stuttgart (No. 214)

Very large root, often four inches in diameter, and is shaped like a top. Skin and flesh pure white. Very crisp, not becoming pithy until very late. Prices: Packet, 5c; ounce, 10c; ¼ pound, 25c; 1 pound, 85c, postpaid; 1 pound, 80c, express.

Squash

One ounce of seed will plant 25 hills. 3 to 4 pounds to the acre.
Culture: Plant is hills same as melon and cucumber.

Summer Varieties

Early White Bush Scallop (No. 221)
Also known as Patty Pan. Dwarf, and upright in growth. Very early, creamy white fruits. Prices: Packet, 5c; ounce, 10c; ¼ pound, 30c; 1 pound, $1.00, postpaid; 1 pound, 95c, express.

Golden Summer Crookneck (No. 222)
Fruits grow to about one foot long, with crooked neck, and quite warted. Color bright yellow. Flesh hard when ripe. Prices: Packet, 5c; ounce, 10c; ¼ pound, 30c; 1 pound, $1.00, postpaid; 1 pound, 95c, express.

White Summer Crookneck (No. 223)
Similar to the Golden, but in color it is an ivory white. Good quality. Prices: Packet, 5c; ounce, 15c; ¼ pound, 30c; 1 pound, $1.00, postpaid; 1 pound, 95c, express.

Fordhook Squash (No. 224)
This variety is the best squash for summer use. When cooked the flavor somewhat resembles the flavor of the sweet potato. Due to this fact this variety is sometimes erroneously called the “sweet potato squash.” The vines are vigorous and productive. The skin is smooth and of a yellow color. The flesh is very thick and of light yellow. Prices: Packet, 10c; ounce, 15c; ¼ pound, 40c; 1 pound, $1.30, postpaid: 1 pound, $1.45, express.

Autumn and Winter Varieties (Hubbard—No. 225)
One of the best of the winter varieties. Flesh bright orange yellow, fine grained and very dry; sweet and richly flavored; keeps well through the winter. Prices: Packet, 5c; ounce, 15c; ¼ pound, 40c; 1 pound, $1.25, postpaid; 1 pound, $1.30, express.

Salsify

Plant some Salsify in your garden this season. Salsify is a splendid vegetable. It is the mildest flavored of the Root crops of this nature. Sometimes called the vegetable oyster. When properly cooked it is most palatable. The roots can be stored for Winter use. This is one vegetable which has been neglected in the past. It should be more generally used.

Mammoth Sandwich Islands (No. 226)
The best variety of Salsify for this country. Prices: Packet, 10c; ounce, 25c; ¼ pound, $2.50, postpaid; 1 pound, $2.45, express.

Spinach

One ounce for 50 feet of drill. 10 to 12 pounds to the acre.
Culture: For Summer use, sow early in the Spring in drills 12 to 15 inches apart, and one inch deep. Later thin out, if necessary, to 6 inches apart. For Winter use, sow in September.

Savoy Leaved (No. 227)
The earliest and the best variety. Plant is upright in growth, with glossy, thick leaves, dark green in color, very much crimped or blistered. It is hardy and grows quickly for use, going to seed in hot weather. Prices: Packet, 5c; ounce, 10c; ¼ pound, 20c; 1 pound, 50c, postpaid; 1 pound, 45c, express.

New Zealand (No. 228)
The stems and leaves are soft, thick and fleshy. If this variety is started early in the Spring the plants will resist heat and make a strong growth in the Summer. Pick off the leaves from the stems and cook only the leaves, and you will have delicious greens all Summer. Prices: Packet, 10c; ¼ pound, 40c; 1 pound, $1.25, postpaid; pound, $1.20, express.
Tomato

One ounce will produce 3,000 to 4,000 plants.

Culture: Start under glass in February, and transplant into the open after all danger of frost is over. For the main crop, sow seed later in hot beds and transplant into the open the fifth feet apart each way.

Spark’s Earliana (No. 230)

The earliest tomato on the market. This is the favorite for first early on the Knoxville market. The plant are compact in growth, and are thickly covered with fruit. The bearing season lasts about four weeks. The tomatoes are uniform in size and smooth, regular form, averaging three inches in diameter and from 2 to 2.5 inches in depth. They are fleshy, solid and stand shipping very well. Prices: Packet, 5c; ounce, 25c; ¼ pound 80c; 1 pound, $3.00, postpaid; 1 pound, $2.95, express.

June Pink (No. 231)

Extra early, purplish pink tomato, similar in growth of vine to the Earliana, as well as in size of the fruit and time of maturing. Prices: Packet, 10c; ounce, 60c; ¼ pound, $1.75; 1 pound, $6.00, postpaid; 1 pound, $6.00, express.

John Baer (No. 232)

Produces large solid shipping tomatoes which ripen early right up to the stem. It is an enormous cropper. Does not burst when ripe. Glistening bright red in color. It is solid and meaty. Prices: Packet, 5c; ounce, 35c; ¼ pound, $1.10; 1 pound, $3.50, postpaid; 1 pound, $3.45, express.

Gulf State Market (No. 242)

This variety is splendid for shipping, for the local market, and for the home garden. The fruit grows medium to large, is round or globe shaped, and has but little depression about the stem. It is smooth and free from cracks. Color, deep purplish pink. The skin is firm and the flesh solid. It is the earliest purple tomato, vines robust and the crop is not susceptible to blight. It is a very heavy yielder. Prices: Packet, 10c; ounce, 40c; ¼ pound, $1.50; 1 pound, $5.05 postpaid; 1 pound, $5.00 express.

Mayo’s New Stone (No. 234)

This is the standard canning variety. Mayo’s Special Strain of New Stone Tomatoes was developed especially for the canning trade. It is also one of the very best main crop tomatoes for the market or home use. The tomatoes are remarkably uniform in size, and are smooth and well shaped. It is a splendid yielder. We have built up a large trade on our special strain of this tomato. They are large, smooth, solid, and of a beautiful scarlet color. Prices: Packet, 5c; ¼ pound, 75c; 1 pound, $2.25, postpaid; 1 pound, $2.50, express.

Ponderosa (No. 235)

One of the largest, if not the largest of tomatoes on the market. Vines vigorous and productive. Fruit of a purplish pink color, very large and comparatively smooth. Very suitable for home use. Prices: Packet, 10c; ounce, 60c; ¼ pound, $1.75; 1 pound, $6.05, postpaid; 1 pound, $6.00, express.

SEVEN TOP—Cultivated for greens only. Prices: Packet, 5c; ounce, 10c; ½ pound, 25c; pound, 75c, postpaid; pound, 70c, express. No. 257.

IMPROVED AMERICAN PURPLE TOP RUTA BAGA—Prices: Packet, 5c; ounce, 10c; ½ pound, 15c; pound, 75c, postpaid; pound, 70c, express. (No. 258).

TOBACCO

One ounce of seed will produce plants enough for one acre. Culture—The seed is sown from February to March in open beds. Ground for beds must be clean, and finely pulverized. After sowing beds should be protected with cheese cloth to protect plants. About June 1st, the plants are set in rich or highly fertilized ground in rows 3 and one half by 3 feet. Cultivate often and destroy worms by applying Arsenate of Lead. For prices on Arsenate of Lead see Insect Remedies in this catalog.

Mayo’s White Burley Tobacco (No. 200)

Mayo’s White Burley Tobacco seed are selected with care. This is the variety which is so prominent in the enormous tobacco development in Eastern Tennessee. Millions of pounds of this variety are marketed each year in this section. This variety commands the highest prices, and is the most profitable of all sorts. Prices: Packet, 20c; ounce, $1.25; ½ pound, $4.50.

Mayo’s Seed Potatoes

Forty-seven years experience in the Seed business have enabled us to perfect our methods of selection of Seed Potatoes, so that we have built up a big business in these. As our Potatoes are selected for seed you will find that these are of good quality, and excellent productivity.

Prices on Seed Potatoes vary, and it is impossible to quote prices in this book. However, if you will drop us a card stating quantities and varieties wanted we will be pleased to send you our latest quotations.

We carry in stock the following varieties: Red Bliss Triumph, Irish Cobbler, Early Rose, Green Mountain, Rural New Yorker, Peerless, Burbank and White Elephant.

We also carry the leading varieties of late potatoes on cold storage for planting in June and July. When you are ready for these drop us a card asking for prices.

After April 1st, we can supply Sweet Potatoes. Write after this date for prices on these. Sweet Potato plants will be ready after May 1st. Write for prices on these then.
General Cultural Directions for Flower Seed

Select your flower beds and make the soil rich with some good compost such as well rotted manure and leaf mold. Shape up the beds so that they are higher in the middle than at the edges, this allows drainage, and will also show up the flowers better. Make the surface of your flower bed as fine and smooth as possible. Remember that in planting, the very small seeds should be just barely covered with soil. In planting flower seeds keep in mind that the seed must not be sown too deeply. Sow all seeds in depth in proportion to their size.

Usually the depth should be four times the diameter of the seeds. Press the ground down firmly on the seeds. Sow in rows so that the small plants may be easily seen. Thin out the plants to keep from their being overcrowed, and keep the beds entirely free from weeds.

PREMIUMS ON FLOWER SEED—When you order one Dollars worth of flower seeds you may select 25 cents worth of flower seeds extra. On $2.00 worth of flower seeds you may select 50 cents worth extra. Remember that this offer is only for flower seeds in packets and ounces. This does not include Bulbs Roots, Plants, or any kinds of seed but flower seeds.

Amaranthus Annual (No. 300)

Coarse annual, plants grown for their foliage and showy flower clusters. Thrives best in a hot sunny situation. Plant outdoors as soon as danger of frost is past. Price, packet, 10c.

Antirrhium—Snapdragon (No. 301) Annual

For gorgeous coloring, few flowers can match the snapdragon. The flowers grow on long spikes which make them well adapted for cut flowers. Easily grown from seeds. If early blooms are desired sow seeds in August or September, covering the young plants with mulch with the coming of cold weather. Plants may be transplanted. Mixed, Price packet, 10c.

Ageratum—Foss Flower (No. 302) Annual

One of the best blue flowers for summer, as it blooms constantly. Splendid for bedding and borders. Easily grown from seed. Thrives in most any kind of soil and climate. Mixed, Price packet, 10c.

Alyssum Annual

LITTLE GEM—Dwarf, compact growing, about five inches in height. Blooms all through the summer. Good for borders. Price, per packet, 5c. (No. 304).

Acroclinium (Everlasting)—This is a splendid everlasting, bearing graceful, daisy-like flowers which when cut and the buds picked can be dried and used for Winter Boquets. Mixed, Packet, 10c, (No. 298)
Asters, Annual

Our selection of Asters is unequaled. The early varieties will bloom in July, and by proper selection of varieties, you can have blooms until frost. Give good, rich soil, frequent working, and for fine big blooms pinch several buds to the plant. Plant out of doors in April and May.

THE MIKADO No. 310—The petals are long and narrow. The outer petals show their full extent while the center petals curl and twist and make a magnificent fluffy aster. Price: per packet, 10c.

GIANT CREGO—(No. 311)—The flowers are very large measuring from four to five inches in diameter. They resemble the Japanese Chrysanthemum. Plants are very strong and grow from two to two and one-half feet high. Blooms from late August to the end of September. Price per packet 10c.

MAYO'S GIANT BRANCHING—The petals are very long twisted and are produced in great abundance. They are borne on long stems and make excellent cut flowers. Price: per packet, 10c.

CARNATION—Marguerite
(No. 359) Annual

Marguerite Carnations are decidedly the most popular carnations with the amateur, as they begin flowering a few weeks from the time of sowing. Our strain is extra fine quality, producing long, strong stems, with an abundance of large, double, beautifully fringed, highly scented flowers. Price per packet, 5c.

Balloon Vine (No. 350) Annual

Rapid growing vine. Grows well in hot places. Flowers white, followed by small balloons filled with seed. Price per packet, 5c.

Balsam—Touch-me-not
(No. 351) Annual

One of the easiest grown annuals. A mass of beautiful flowers. Plant so that plants will have room to spread. Mixed colors, 5c per packet.

Calliopsis or Coreopsis
(No. 356) Annual

Beautiful plant of easy culture. Sow seed out of doors in May. Give lots of sun. Allow plants to bloom twelve inches apart. Keep old flowers pinched off and will bloom in Autumn. Mixed colors, 5c per packet.

Candytuft (No. 357)

Easy to grow. Sow in April for first blooming plants, and follow with successive plantings to secure flowers all through the season. Mixed, 5c per packet.

MAYO'S MIXTURE OF ANNUAL FLOWER SEEDS (No. 299)—This is not a mixture of wild flowers but is a mixture of garden annuals. It contains different hardy flowers that will grow and flourish with little care. This is especially valuable for children's gardens or for beautifying waste places or vacant lots. It is also advisable to sow this mixture in the vegetable garden where the plants may be cultivated and the blossoms kept cut close so as to encourage the production of flowers. Remember that you should always keep flowers picked closely, otherwise they will form seed pods and the blooming will cease. Prices: Packet 5c, ounce, 10c; ¼ pound 30c, 1 pound, $1.00.
Canterbury Bells (No. 370) Biennial
Can be sown in April or May in the open season, or can be planted in boxes or pots in the summer, and then transplanted to some sheltered place where they will be protected from the cold weather, and then transplanted to permanent place in the Spring in good rich ground. This is a beautiful plant growing 2 to 4 feet high, filled with bell shaped flowers of rich colors. Price per packet, 10c.

Celosia—Cockscomb (No. 371) Annual
Easily grown annual, with rich comb-like flowers. Fine for the flower beds. Price, Packet 10c.

Calendula—Pot Marigold (No. 372) Annual
Annual, 2 feet high. Should be in every flower garden. Colors range from white to deep orange. Very easily grown. Orange, 10c per packet; White, 10c per packet; Yellow, 10c per packet; Mixed 10c per packet.

Cardinal Climber (No. 378) Annual
A very rapid growing vine, grows 30 feet or more. Has beautiful fern-like foliage, covered from mid-summer till frost with round red flowers, borne in clusters. Plant in a sunny place. Price per packet 15c.

Cosmos (No. 373) Annual
A beautiful Autumn blooming plant. They furnish an abundance of decorations just when other flowers are scarce, producing a multitude of beautiful flowers in pure white, pink and crimson shades. This is one of the easiest grown flowers from seed, and should be found in every flower garden. Sow the seed in the open ground when danger of frost is past. Price: Single Mixed, per packet, 5c; Double Mixed, 10c per packet.

Centaureas, Annual
A good many of our old fashioned perennial flowers are included under this name, such as Cornflowers, Sweet Sultans and Bachelor Buttons. It is always best to order by the botanical name. These flowers are all easily grown.

Centaureas—Cynus (No. 363) Annual
Good contrast plant for edging beds. Sow seed early indoors and transplant out in April or May. Price, per packet, 10c.

Corn Flower Annual
Bachelor's Button (No. 362)
These are well known to every flower lover. They are easily grown, and should be found in every flower garden. Price per packet, 5c.

Centaureas Imperialis (No. 364) Annual
Sweet Sultan, Mixed. Price per packet, 5c.

Centaureas—White Leaved (No. 365) Annual
Dusty Miller. Price per packet, 10c.

Cobaea Scandens, Annual
A rapid growing vine with bell shaped flowers which are at first a clear green turning to beautiful purplish lilac. In good season this vine will grow 50 to 60 feet. Seeds should be sown in moist earth, edge down. Price, 10c. (No. 366).
Gaillardia

Gaillardia (No. 383) Annual

Amongst hardy Perennial plants Gaillardia are conspicuous for profusion and duration of flowers. They bloom all Summer until late Fall. Colored flowers, red and yellow, very showy.

They produce a most gorgeous effect in gardens and borders. Fine cut flowers as they last a long time in water. Thrive best in light open, well drained soil and should have full benefit of air and sun. Prices: Packet, 10c.

For-get-me-Nots

For-get-me-Nots (No. 287) Perennial

For-Get-Me-Nots prefer moist half shady places, but any open sunny border will do if not too dry. Prices, packet, 10c.

Hollyhock (No. 385) Perennial

One of the easiest grown perennials. In this part of the country you can sow the seeds out of doors in the Summer. Make the soil rich and deep. These can be transplanted in the Spring. They are tall growing, producing wonderful brilliant flowers. Prices, per packet, 10c.

Gourds, Annual

Ornamental; rapid climbers, growing from 15 to 20 feet. The following varieties at 5c per packet: Dipper, Hercules, Egg Shaped, Dish Rag and mixed; each 5c per packet.

Cypress Vine (No. 374)

Good quick viner. Foliage delicate and fern-like. Flowers bright crimson and white. One of the most popular vines grown. Sow in May. Price, per packet, 10c.

Dianthus or Pinks Annual

One of the most popular varieties of flowers in cultivation. An endless variety of shapes and colors, with superb markings. Many have delightful odors. Sow seed in the open early in the Spring. Give slight protection after hard frost. They will bloom better second season than the first.

MARIGOLD (Annual)

Marigolds should be included in every flower garden. They are very easy to grow, and will yield an abundance of beautiful flowers. They are especially good for garden displays.

Marigolds in the mixed colors contain many beautiful colors. Our Double Golden Yellow Marigold, and Double Lemon Yellow Marigolds grow large sized flowers. These are worthy of good attention.

Marigold

Mixed Colors—Price per packet, 10c. (No. 396).
Double Golden Yellow—Price per packet, 10c. (No. 397).
Double Lemon Yellow—Price per packet, 10c. (No. 398).

Delphinium (Larkspur)

No flower garden is complete without Larkspur. These are very easily grown. The Belladona Larkspur is an early and continuous bloomer. The flowers are light azure blue in color. The easiest grown Larkspur is the annual mixed. The flowers are spikes of various shades of Red, Blue, White, etc. They thrive on most any kind of soil, but a sunny situation is best suited for them.

Belladona—Beautiful blue, grows to good size. Price per packet, 10c. (No. 392).
Annual Mixed—Beautiful mixed colors on long stems. Good for cutting. Price per packet, 10c. Rose, 10c per packet; Sky Blue, 10c per packet. (No. 393).

Kocia or Burning Bush, Annual

A popular annual, sometimes known as mock Cypress. Easily grown from seed. Good for flower beds or pots. Price per packet, 10c. No. 394.

Gypsophila or “Baby’s Breath”

A pretty garden annual growing about 2 feet high, blooming all summer long with clusters of snow white flowers. Price per packet, 10c. No. 395. (Annual).

Helichrysum (Straw flowers or Everlastings) No. 399, Annual

These are showy garden annuals, blooming from early summer till late frost. However they are mostly used for decorative purposes during the Winter months. The flowers should be cut before the blooms are fully opened, and then be put in a cool place to dry. Then these showy flowers will last nearly all Winter and will remain in good condition all the while. It is from this habit that they get the name Everlasting. MAYO’S SPECIAL MIXTURE. Price per packet 10c.

Helianthus (Sunflower) Annual

Double Dwarf—These are popular cut flowers as well as garden display, growing in bushes from 3 to 4 feet high, bearing flowers from June till frost. The flowers are from 3 to 4 inches across and are on long stems. Price per packet, 10c. (No. 390).

Mammoth Russian—The good old standard, giant variety of sunflowers, produces immense flowers. Price per packet, 10c. (No. 391).
Mayo's Superb Nasturtium (Annual)

Nothing excels the Nasturtiums for ease of culture, duration of bloom, and brilliancy of coloring. They are one of the easiest flowers to grow. All they require is a moderately good soil, well drained, and a sunny position. They will begin to bloom within a few weeks after they are planted, and will continue blooming until hard frost comes.

Mayo’s Special Mixture of Tall Varieties (No. 400)

This mixture contains all of the large, tall growing Nasturtiums. We especially recommend it where the trailing variety is wanted. Price 5c per packet, 10c ounce, ½ pound 25c.

Mayo’s Special Mixture of Dwarf Nasturtiums (No. 401)

This mixture of all of the Tom Thumb varieties is splendid for planting in beds to be used as a border. This variety should be found in every place. Prices: Packet, 5c; ounce, 10c; ½ pound, 25c.

TALL—The climbing or tall variety is by far the most used of any vine in cultivation. There are many varieties, both of colors of leaves and flowers. Plants thrive in any soil and bloom constantly. Mixed colors, 5c per packet.

Castor Bean (No. 402) Annual

RICINUS—Castor Beans, much improved, strictly annual. Plants 10 feet high, immense leaves. Per packet, 6c.

Portulaca (No. 403) Annual

Sow in May in warm sunny situation. Care should be taken not to get them too thick. Large Flowering Mixed Colors, 10c per packet.

Phloxdrumondii (No. 408) Annual

Should be sown in masses or borders. Of very easy culture. Bloom very early. About 12 to 15 inches high. Large range of colors and marking; 10c per packet.

Eschscholtzias—California Poppy (No. 406) Annual

This is one of the most beautiful and popular Annuals. It is very easy to grow. From Spring sown seed they flower profusely till late Autumn. The plants are dwarf, branching, growing about one foot high. Fine mixed colors, such as soft pink, scarlet, the different shades of yellow, purple, etc. Be sure and include these in your order this season. Price per packet, 10c.
Mayo's Pansies

Perennial

Pansies thrive best when exposed to the morning sun. Soil of clayish nature well enriched grows the best pansies. 

Mayo's Special Mixed: These contain a well balanced mixture of all colors. Nice large flowers. Price per packet, 10c. (No. 410).

Giant Trimardeau: This is the best Giant variety of Pansies. Good bloomer, contains all colors. Price per packet, 10c. (No. 411).

Salvia, Perennial

For masses of bright scarlet colors, nothing will give as good effect upon the lawn. Sow indoors or in frames, so as to have the plants ready to transplant the first day of May. Or sow out of doors as soon as danger of frost is over. But they will bloom later in the summer than the transplanted ones. Salvia is necessary for every flower garden. Produces flowers in abundance. It is good for borders. Price per packet, 10c. No. 421).

Mayo's Petunias

Annual

Petunias thrive in this section. They are easily grown and should be in every flower garden. They are especially valuable for their great varieties of colors and long blooming qualities.

Mayo's Giant Double Mixed Petunias

Annual

Mayo's Giant Double Mixed—The edges are fringed, petals fluted. Contains a rich variety of colors. Flowers very large. The flowers of these Double Petunias are large, double, and include a variety of the different colors. The edges of the flowers are fringed, and the petals fluted. Price, per packet, 25c. (No. 416).

Ruffled Mixed Petunias 10c packet.

Mayo’s Superb Single Mixed Petunias

Annual

Mayo's Superb Single Mixed—Large flowers, of all colors. Price per packet, 10c. (No. 415).
Paeonias

We should have more Paeonias. Once bulbs are planted in their permanent places they require little attention. From year to year they get better. Bulbs in Pink, Red, or White at 60c per clump, postpaid.

Poppies

You must sow these early in February or March, and where you want them to bloom, as they will not trans-

MARVEL OF PERU—FOUR O'CLOCK (No. 450)

Four O'Clock is an "Old Fashioned Flower" easily grown in any garden soil. Erect bush growing quickly, blooms in the late summer and fall. Flowers Red, Yellow, White and Striped. Open on cloudy days and in the late afternoon. (Whence it the common name "Four O'Clock") and closing in the morning. A useful plant for growing in hedges, plant one foot apart at the rear of the flower garden. Price packet, 10c.

STOCK (No. 451)

Stocks are applied to all purposes, bedding, pot culture or cut flowers. They are easily grown, producing beautiful flowers in all colors. Price per packet, 10c.

VERBENAS (No. 452)

These are one of the very best annuals. Flowers bloom in beautiful clusters of showy flowers, and bloom from June till frost. Our special mixture contains all of the most beautiful colors. These are easily grown, and should be in every flower garden. Price per packet, 10c.

Moonflower (No. 375)

Moonflower should be grown in warm places, and the soil should be well watered. If kept well watered during the growing season this will reach a vine 60 feet long in a season. The flowers open about sunset and close the next morning, tho on cloudy days they will remain open till noon. On moon light nights these are beautiful. The flowers are large and satiny, and are fairly fragrant. Price per packet 10c.

MAYO'S SPECIAL MIXED ZINNIAS (No. 436) These are the small old fashioned Zinnias which have been popular in flower gardens for generations. All varieties of the smaller sorts mixed. Prices: packet, 5c; ¼ ounce, 15c; ounce, 50c, postpaid.
FOX GLOVE (DIGITALIS) BIENNIAL
(No. 491)
These wonderful old-fashioned border plants, having dense spikes of large brilliant flowers, are very distinct and showy. The flowers are shaped like thimbles and include many beautiful colors. Prefers cool, shady locations, such as in front of shrubbery. Mayo’s special mixture, 10c per packet.

SHASTA DAISY, PERENNIAL (No. 492)
A most splendid plant producing flowers seldom under five inches across. Flowers are glistering white, with broad overlapping petals, and borne on long straight stems. Beautiful for cut flowers, and last when cut for several days. Mayo’s Special, 10c per packet.

WALL FLOWER, BIENNIAL (No. 493)
This beautiful flower will oftentimes live through the Winter in this section. We have seen them in flower in mid-winter. This is a favorite European Garden flower; has long fragrant spikes and is very useful in making bouquets. Mayo’s Special, 10c per packet.

MOURNING BRIDE (Scabiosa) Annual (No. 494)
This sure blooming plant produces beautiful flowers in exquisite shades which are borne on long stems. When cut they keep in good condition for a week. Sow the seed early and they will begin blooming in July and continue blooming until hard frost. Good for borders and beds, also splendid for cut flowers. Plants about 2½ feet high. Mayo’s Special Mixture, 25c per packet, postpaid.

HYACINTH, Annual (No. 495)
This is one of the most rapid climbers known. Splendid for covering arbors and trellises, etc. The vines are early covered with violet and white pen-shaped blossoms which last until late Fall. The leaves are heart shaped. Mayo’s Special Mixture, 10c per packet, postpaid.

PRIMROSE, Perennial (No. 496)
Large, showy, saucer-shaped blossoms. The blossoms are yellow and white and are easily produced. Produces large sized flowers. Mayo’s Special Mixture, 15c per packet, postpaid.

JAPANESE MORNING GLORY, Annual (No. 497)
This superb, many colored, variety which was developed in Japan, is one of the most free flowering and rapid growing plants known. They thrive in almost any situation, and the beauty of their delicate brilliant flowers is unsurpassed. Mayo’s Special Mixture, 10c per packet, postpaid.

LUPINUS (No. 550)
Free flowering, easily grown annuals, with long, graceful spikes of rich and various colored pea-shaped flowers. Valuable for mixed borders, bed and cuttings. It prefers a little shade. Mixed, 10c per packet.

NICOTINA (No. 560)
An early grown annual. It is very effective. Blooms shaped like a petunia blossom but with longer tube. Flowers open toward evening and emit a powerful perfume. Mixed, 10c per packet.

SALPIGLOSSIS (No. 570)
A most attractive annual and should be in every garden. Blossoms shaped like a petunia but have a greater variety of bright colors. Flowers are veined with a glint of gold. Mixed, packet 15c.

VINCA ROSEA (Periwinkle) (No. 580)
Very ornamental with dark laurel light foliage, handsome pink and white flowers. If sown early enough it will bloom the first Summer. They can be taken up in the Fall, potted and be kept blooming through the Winter. Mixed, packet 10c.

THUNBERGIA (Black Eyed Susan) No. 590
A lovely trailing plant with large showy flowers. It will trail over the ground forming a dense mat of foliage and flowers. Colors range through all shades of Yellow, Orange, Buff and Snow White, mostly with jet black centers, all colors mixed. Packet 10c.
Mayo's Zinnias

Zinnias sometimes called "Old Maids," are perhaps the easiest grown of all garden flowers. They thrive in most any kind of soil, and they flower exceedingly well under almost any weather conditions. They begin to flower early in the season and continue in blossom until the first hard frost. During the last few years, Zinnias have come into prominence as one of the most popular flowers which we have. This is due to the fact that the improved varieties offer flowers which are unexcelled in beauty by any other flowers.

Mayo's Mammoth Double Zinnias

These are the mammoth Zinnias. On the back page of this catalog you will find their picture in colors. This is one of the most beautiful flowers. The blooms grow to an immense size, oftentimes as large as a good sized Dahlia Bloom. Be sure and plant some of these this season. Last year these Zinnias were the sensation around Knoxville. We have these in separate colors and mixed colors as follows:

ORANGE (NO. 424) An exceedingly large variety, splendid coloring. Price 15c per packet, postpaid.

BRIGHT ROSE (NO. 425) A delightful shade of rose, very large. Price 15c per packet, postpaid.

WHITE (NO. 437) A very large white flowered variety. Price 15c per packet, postpaid.

Mayo's Giant Dahlia Flowered Zinnias

This wonderful Zinnia is an improvement on our Giants of California. The flowers grow to an immense size and have curved petals resembling the Dahlia bloom, from whence the name is taken. They are very easy to grow and on account of their mammoth size, rare blossoms, will become very popular just as soon as they are well known. These should be in every home garden. We have these in the following varieties:

EXQUISITE (NO. 431) Beautiful light rose with center deep rose, a most remarkable dahlia-like flower. Price 25c per packet, postpaid.

GIANT ATTRACTION (NO. 432) A distinct shade of brick red which carries the color well from the bud and forms into an immense ball of color when in full bloom. Price 25 cents per packet, postpaid.

ORIOLE (NO. 433) The most beautiful of its class. It is an immense orange and gold bicolor, changing slightly as it ages, but at all times worthy of the beautiful bird for which it is named. Price per packet 25c, postpaid.

BUTTERCUP (NO. 434) An immense deep creamy yellow. A most desirable flower which should be in every collection. Price 25 cents per packet, postpaid.

MAYO'S SPECIAL MIXTURE OF GIANT FLOWERED ZINNIAS (NO. 435) This is a special mixture of all of the varieties described above and many others. Prices: packet, 20c; ¼ ounce, 75c.
Sweet Peas, Annual

The soil for Sweet Peas should be rich and deep. They should be planted so as to have sunlight and air on both sides of the row. We have had excellent results from growing sweet peas in the vegetable garden. In the average vegetable garden the soil is good. The sweet peas are out of the way in time for later vegetables. Sow the seed as early as you can cultivate the soil, the earlier the better. Sow in a trench about one inch deep. As soon as they are up thin out to two or four inches apart. They should be staked up so as to support the vines. Keep watered during dry weather. Cut the flower as often as possible, as this prolongs the blooming period.

MAYO’S SPECIAL MIXTURE SWEET PEAS (No. 460)

This mixture of the standard varieties is composed of the finest varieties of all colors and shades. We take especial pains to see that this mixture is evenly balanced so as to get the most varied effect of all the superb colors and markings in the better varieties of Sweet Peas. Prices: Packet, 5c; ounce, 10c; ¼ pound, 30c; pound, $1.00.

SWEET PEAS IN SEPARATE COLORS

There are so many named varieties of sweet peas in which the colors and the markings are the same as other varieties, that we have eliminated all but the choicest varieties of each color. We have the following colors in stock: Pure white, pink, purple, light blue, dark blue, red, lavender, pink and white, etc. Prices on any of these colors: Packet, 10c; ounce, 15c; ¼ pound, 40c; pound, $1.25.

SWEET PEAS—Orchid Flowering Type

The old fashioned standard varieties of Sweet Peas are quite overshadowed by the wonderful Spencer or orchid flowering type of Sweet Peas. These have large round flowers of unusual size, usually measuring two inches across, with wavy standards and spreading wings, with as high as four immense flowers to the stem. They have exceptionally good value for cutting. They are as easy to grow as the standard types.

The nine best varieties of Orchid Flowering Sweet Peas are the following: WEDGEWOOD SPENCER (Blue), BLANCH FERRY SPENCER (Pink and White), GEORGE HERBERT SPENCER (Rose Carmine), WHITE SPENCER (Large pure white), OTHHELLO SPENCER (Rich deep Maroon), COUNTESS SPENCER (Rich Pink), ASTA OHN SPENCER (Lavender and Mauve), KING EDWARD VII (Bright Crimson Scarlet). Price any of the above, 10c Packet; ounce, 35c; ¼ pound, 90c.

MAYO’S SUPERB MIXTURE OF ORCHID FLOWERING SWEET PEAS is composed of all of the above varieties and many other fine varieties. This mixture is one of the finest that we have seen. Prices: Packet, 10c; ounce, 20c; pound, $2.00.

SWEET WILLIAM

One of the very best flower garden plants. The plants grow one foot high and form fine clumps. The flowers are beautiful. Price per packet, 10c.
Summer Flowering Bulbs

Caladium (Elephant Ear)—Large tropical-looking plant, succeeding best in rich, moist soil with plenty of water. Plant in the open in April. First size, 5 inches, 15c, postpaid, express, 10c. Second size, 7 inches, 25c, postpaid; 20c each, express. Third size 9 inches, 35c, postpaid; 25c, express. Mammoth size, 11 inches, 45c, postpaid; 35c, express.

PEONIES—Large clumps, different colors, 45c per clump, postpaid; 60c per clump, express.

DAHLIAS—Separate colors, 35c each, postpaid; $1.50, dozen; $2.50, express. Mixed unnamed Dahlias 30c each, postpaid; $1.50, dozen; 15c each, express.

Cannas

GLADIOLUS—A very satisfactory bulb, always sure to bloom, which, when cut, will keep in water for a week. Colors: white, pink, red, yellow, splotched, mixed, 40c per dozen; $3.00 per 100 by express.

Per doz. Per 100

AMERICAN GLADIOLUS, Light Pink 60c $5.00

AUGUSTA GLADIOLUS, White 60c $5.00

FRANCIS KING GLADIOLUS, Red 60c $5.00

HALLEY GLADIOLUS, Salmon Pink 60c $5.00

MADERIA VINES—Rapid growing, delicate leaved vine for veranda. Blooming white fragrant flowers. Postpaid, doz. 30c; three 10c, 5c each.

DOUBLE PEARL TUBEROSE—Too well known to require any word from us. No. 1, 50c dozen, 10c each. By mail add 10c postage per dozen.

Cannas

GREEN FOLIAGE VARIETIES

City of Portland. 3½ feet. A glowing shade of pink. Large sized flowers borne on heavy trusses. Prices: 10c each; 1 dozen $1.10, postpaid; 1 dozen, $1.05, Express.

Golden Gate. 4 ft. high; gold spotted with orange and crimson. Prices: 10c each; 1 dozen, $1.15 postpaid; 1 dozen, $1.05, express.

Richard Wallace. 4 ft. high; Canary yellow. Prices: 10c each; 1 dozen, $1.10, postpaid; 1 dozen, $1.00, express.

Yellow King Humbert. 4 ft. high. A large golden yellow flower splotched with red. Prices: 15c each; 1 dozen, $1.30, postpaid; 1 dozen, $1.20, express.

Indiana. 6 ft. high. Orchid-flowering, bright scarlet. 7 inches across. Prices: 10c each; 1 dozen, $1.10, postpaid; 1 doz, $1.00, express.

Madam Cozy. 3½ ft. high. Brilliant scarlet edged with yellow. Prices: 10c each; 1 dozen, $1.10, postpaid; 1 dozen, $1.00, express.

Souv. de Antoine Crozy. 3 ft. high. Red with golden yellow border. Prices: 10c each; 1 dozen, $1.10, postpaid; 1 dozen, $1.00, express.

Meteor. 4½ ft. high. Deep, dazzling crimson produced in mammoth clusters. Prices: 10c each; 1 doz. $1.10, postpaid; 1 doz. $1.00, express.

Louisiana. 6 ft. high. Orchid-flowering variety of vivid scarlet. Prices: 10c each; 1 dozen, $1.10, postpaid; 1 doz, $1.00, express.

Pennsylvania. 6 ft. high. Large orchid-flowering, scarlet overlaid with orange. Prices: 10c each; 1 dozen, $1.10, postpaid; 1 doz. $1.00, express.

BRONZED LEAVED VARIETIES

King Humbert. 4 ft. high. Orchid-flowering type. Leaves are purple madder brown over bronze. Plants are orange-scarlet. Prices: 15c each; 1 doz. $1.35, postpaid; 1 doz., $1.25, express.

Shenandoah. 4 ft. high. Salmon pink. Prices: 10c each; 1 doz. $1.10, postpaid; 1 doz. $1.00 express.

Wyoming. 7 ft. high. Orchid-flowering. Prices: 10c each; 1 doz. $1.10 postpaid; 1 doz. $1.00 express.

Wintzer’s Colossal. 5 ft. high. Very large variety. Sometimes measures eight inches across. Prices: 15c each; 1 dozen, $1.35, postpaid; 1 dozen, $1.25, express.

Mixed Cannas. All colors, mixed. Prices: 10c each; 1 doz. 80c, postpaid; 1 doz. 70c, express.
ALFALFA—60 pounds to the bushel (No. 800)

Alfalfa is one of the best paying hay crops known. It yields more cuttings of very valuable hay than any other crop. It is rapidly increasing in use throughout the South. Alfalfa once established lasts for years.

Sow twenty pounds of seed to the acre in March, April, or September. In order to insure a successful crop of Alfalfa it is necessary to take great care with your seed bed. Some good green manure crop should be turned under the year before seeding, and this should be followed by some good cleanly cultivated crop to get rid of any acid formed by the decaying vines of the green manure crop. It is also necessary to fertilize the crop heavily with either barnyard manure or commercial fertilizer. In addition to this the soil must be thoroughly limed. Remember that we are Alfalfa Seed experts. Leave the selection of your seed to Mayo. Prices: 45 cents pound, postpaid. 40 cents pound, f. o. b. Knoxville. Write for prices on larger quantities.

CRIMSON CLOVER, 60 POUNDS TO THE BUSHEL (No. 801)

Sow in late summer and fall. This crop is worth millions of dollars to the Southern farmer. It makes a fine clover, and an excellent grazing crop during the winter and spring. It is a splendid thing to plow under early, thus enriching the soil. It is also quite successfully sown in the corn when it is laid by. Sow fifteen pounds to the acre. Prices: 25 cents pound, postpaid. 20 cents pound f. o. b. Knoxville. Write for prices on larger quantities.
MAYO'S CLOVER SEED

The clovers are more generally used for hay, pasture, and soil improving crops than any of the other legumes or the other grass seeds. They are the most prominent of the leguminous crops, and form the very basis of successful farming.

With the exception of Japanese Clover, and Crimson Clover, all the Clovers can be sown either in the Spring or the Fall. Japanese Clover should be sown only in the Spring, while Crimson Clover should be sown only in the Fall and early Summer. Frequently Red, Sapling and Alsike Clovers are sown at the last working of the corn.

Red Clover—60 pounds to the bushel (No. 802)

This is the standard clover for hay, pasture, and soil improver, wherever it is sown. Red Clover will yield two or three years from one seeding, and on good ground will yield two to three cuttings to the year. Red clover should be cut for hay while in bloom. In mixtures sow with Orchard and Tall Meadow Oat Grass, as these grasses ripen together. Sow by itself at the rate of one gallon to the acre. Prices: 50 cents per pound, postpaid; 45 cents per pound, f. o. b. Knoxville. Write for prices on larger quantities.

Mammoth or Sapling Clover—60 pounds to the bushel

Very similar to Red Clover, in appearance of seed, and in habits of growth. However, it grows larger and is later in maturing. It is particularly well adapted to thin lands, and should be used in mixtures with Red Top and Meadow Fescue. Sow 1 gallon to the acre by itself. Prices: 50 cents per pound postpaid; 45 cents per pound, f. o. b. Knoxville. Write for prices on larger quantities.

Aslike Clover—60 pounds to the bushel (No. 803)

Alsike Clover seeds are small and it does not require as many pounds to the acre as regular clover. It withstands heat and cold better than Red Clover. As it has weak stems it should never be sown alone, it thrives on low moist soils, and will grow on ground which is too acid to produce Red Clover. It lasts from six to eight years. On well cultivated and rich uplands it produces good nutritious hay, when combined with Timothy. Yields of as much as two tons of hay to the acre have been reported. When sown on low ground the proper accompanying grass is Red Top. Also works well in mixtures of Tall Meadow Oat Grass, Orchard Grass and Blue Grass. In mixtures sow from three to six pounds to the acre. Prices: 40 cents per pound, postpaid; 35 cents per pound. f. o. b. Knoxville. Write for prices on larger quantities.

White Clover—60 pounds to the bushel (No. 805)

White clover is largely used in lawn and pasturage mixtures. It is close, thick, and compact growing, frequently covering the ground like a carpet. Especially adapted to pasture mixtures for cattle. This is very quick growing and it is advisable to sow along with blue grass where a permanent pasture of blue grass is to be desired. You get immediate effects from the clover. Sow about three pounds to the acre in the mixtures. Prices: 80 cents per pound, postpaid; 75 cents per pound, f. o. b. Knoxville. Write for prices on larger quantities.
SWEET CLOVER

60 pounds to the bushel

Also known as Bokhara Clover. It is a splendid land builder. Worn out soils can be rapidly reclaimed by growing sweet clover. It thrives on our limestone soils, but will grow well on other kinds. We should grow more sweet Clover. It is very valuable for Bees. It produces a splendid hay, and makes a good pasture. It is valuable in preparing for a crop of Alfalfa, as it inoculates the soil. We recommend that the hulled seed be used. It is advisable to inoculate the seed before sowing. Sweet Clover in some ways has advantages over Alfalfa. It thrives on thin and worn out soils and stands drought well. It is very valuable as a green manure crop.

WHITE BLOSSOM SWEET CLOVER

This is the most common variety. Makes splendid pasture, and fine hay. Prices: 15 cents pound, postpaid. 30 cents pound, f. o. b. Knoxville. Write for prices on larger quantities.

YELLOW BLOSSOM SWEET CLOVER

Somewhat dwarfer growing than the White Blossom. Splendid for sowing on worn out soils where quick results are desired. Sow 15 pounds to the acre in February, March, April, September and October. Prices: 35 cents pound, postpaid. 50 cents pound, f. o. b. Knoxville. Write for prices on larger quantities.

Japanese Clover (Lespedeza) No. 808

This clover is splendid for sowing on waste or barren lands. Once started it spreads very rapidly. This crop is a factor in the reclamation of lands which have been considered valueless for years. It is splendid for grazing, though in the extreme South it yields good hay. It is splendid for sowing in old pastures that are infected with broom sedges, as it quickly spreads over the ground. Sow about ten pounds to the acre in March and April. Prices: 45 cents pound, postpaid. 40 cents pound f. o. b. Knoxville. Write for prices on larger quantities.

SWEET CLOVER

Peanuts

Two bushels in the hull will plant one acre. 22 pounds to the bushel

Culture: A very profitable crop for medium, light, loamy, sandy land. They are large yielders. In addition to the crop of nuts, they yield a large crop of forage, usually about a ton to the acre. Shell before planting, and plant in May and June, in rows about three feet apart, and in the row, one nut to the hill, which should be eight to ten inches apart. Cover one to two inches deep, and cultivate often, taking care in the last cultivation not to injure the roots. Use lime on the top of the row just after planting, and use Land Plaster just after the last cultivation on the top of the row.

Spanish Peanuts (No. 809)

In addition to the crop of nuts, the tops make a large yield of hay, which is valuable for fattening hogs and other stock. Early in maturing, and very productive. The nuts are smaller than the other varieties, but very sweet. Prices: Packet, 5c; pound, 25c, postpaid; pound, 20c, express. Write for prices in larger quantities.

Virginia Peanuts (No. 810)

Usually grown for commercial uses. It makes considerably larger nuts than the Spanish. Prices: Packet, 5c; pound, 25c, postpaid; pound, 20c, express. Write for prices in larger quantities.

Tennessee Red Peanuts (No. 811)

This is one of the very best varieties for this section. It combines the sweetness of the Spanish Peanut with the size of the Virginia. Larger than the Spanish, but hardly as large as the Virginia nut. The pods are longer than either of the above varieties and are filled with nuts of bright red skin. Very desirable for eating purposes. Prices: Packet, 5c; pound, 25c, postpaid; pound, 20c, express. Write for prices on larger quantities.
As the prices of Grass Seed, Clover Seed and all Farm Seed vary very rapidly, we do not quote quantity prices on them in this book. Write us for prices at any time and we will be pleased to quote you. Remember that our MAYO’S SELECT GRADES of Grass and Clover Seeds are the cream of the seed crop. If you want the best grade of seeds, order MAYO’S SELECT GRADES.

We are Seed Specialists. Our entire time and attention is devoted to the Seed Business. We spend each year a good deal of time and money in just the SELECTION of our seed stocks. In fact, every working day of the year we are busy looking after this end of the business. We get our seeds from all parts of the world.

It is with pride that we watch the growing sale of MAYO’S SELECT GRADES of Grass and Clover Seeds. In ordering this grade of seed our customers get the advantage of the time and care we spend in the selection.

Our export Grade of Seed is the next grade to our Mayo’s Select. Export Grade is usually handled as the best throughout the country. This is a good grade of seed, at a trifle lower cost than our Mayo’s Select.

**Kentucky Blue Grass—14 pounds to the bushel (No. 812)**

This is the best base for a permanent pasture. Also the best lawn grass known. It is especially adapted to our limestone soil. Though it grows slowly at first, it finally establishes a compact turf which will last indefinitely. As this grows slowly at first, it is the best idea to sow other grasses with this to give quick pasturage while the Blue Grass is getting started. This should be one of the principal mixtures for every permanent pasture. It is a good idea to sow some Blue Grass on your farm every year. Sow in the Fall or Spring at the rate of 3 to 4 bushels to the acre. Prices: 65 cents per pound, postpaid; 60 cents per pound, f. o. b. Knoxville. Write for prices on larger amounts.

**Bermuda Grass (No. 813)**

In a great many places this is one of the most valuable grasses which we have. Many people look on Bermuda as a pest. It is troublesome in some places, but it can readily be controlled. We should use it one steep hillsides which have a tendency to wash. In the lower part of the South this grass is about the only grass which succeeds, as it thrives on loose, sandy soil and withstands heat better than any grass we know of. The seed should be sown only in the late Spring and Summer, after all danger of frost is over. The young plants are easily killed by frost, but once the roots are started it withstands our cold winters. Sow from 5 to 6 pounds to the acre. Prices: 75c per pound, postpaid; 70 cents per pound, f. o. b. Knoxville. Write for prices on larger amounts.
Tall Meadow Oat Grass—11 pounds to the bushel (No. 814).

Tall Meadow Oat Grass ripens at the same time as Orchard Grass, and gives splendid satisfaction when sown with this and Red Clover. It is a good Hay crop, and can be cut twice a year. The quality of the Hay is very nutritious. When sown alone use two bushels to the acre. In a pasture mixture sow one bushel of Tall Meadow Oat Grass, one bushel of Orchard Grass and ½ gallon of Red Clover. It is also a good idea to add about 2 pounds of Red Top to this mixture. Cut for hay while in bloom. Sow either in the Spring or the Fall. Prices: 40 cents per pound, postpaid; 35 cents per pound, f. o. b. Knoxville. Write for prices on larger quantities.

Orchard Grass—14 pounds to the bushel (No. 815).

This is a vigorous grower, and yields a good crop of fine quality of Hay. Frequently two or three crops of hay can be cut during the season. This grass is especially adapted to pasture mixtures, and also succeeds well in shady locations, such as orchards, and parks. It matures early and is well adapted to sow with Tall Medow Oat Grass and Red Clover. Orchard can be sown either in the Spring or the Fall. The better time for sowing is in the Spring. Sow by itself at the rate of two bushels to the acre. For a pasture mixture see suggestions in Tall Meadow oat Grass. Prices: 35 cents per pound, postpaid; 30 cents per pound, f. o. b. Knoxville. Write for prices on larger quantities.

Timothy—45 pounds to the bushel (No. 816).

This makes one of the most popular and easiest sold hays. This should not be grazed or cut too closely. On good ground it will yield from two to three tons to the acre. It requires good ground to make good crops. Timothy is not considered as much a soil improver as other grasses, and should never be sown on light, poor soils. When sown with Sapling Clover they both ripen together. Red Top matures at the same time as Timothy, and these two grasses make a splendid and low cost mixture for hay. Sow by itself at the rate of ½ bushel to the acre. Mixed, sow 1 gallon Timothy and four pounds Red Top to acre, or 1 gallon Timothy, 4 pounds Red Top, and 6 pounds Sapling Clover to the acre. Prices: 25 cents per pound, postpaid; 20 cents per pound, f. o. b. Knoxville. Write for prices on larger quantities.

Red Top or Herds Grass—14 pounds to the bushel (No. 817).

This grass is well adapted to all soils and situations throughout the South. It succeeds very well on light sandy soils, and is splendid on the richer and heavier soils as well. This should also be used in most all mixtures. It lasts a long time and spreads very rapidly. It is good for pasture and makes fine hay. Sow either in the Spring or Fall at the rate of 6 pounds to the acre by itself. For mixtures see the formulas suggested in Timothy, Tall Meadow Oat Grass, and Orchard Grass. Prices: 50 cents per pound, postpaid; 45 cents per pound, f. o. b. Knoxville. Write for prices on larger quantities.

Meadow Fescue or Randall Grass (No. 818).

This grass is especially adapted to the mountainous sections of the South. When sown with Timothy and Red Top, sow one bushel Meadow Fescue (14 pounds), 5 pounds Red Top, and 6 pounds Timothy to the acre. For pasture, sow one bushel Meadow Fescue, ½ bushel Tall Meadow Oat Grass and ½ bushel Orchard Grass to the acre. Prices: 40 cents per pound, postpaid; 35 cents per pound, f. o. b. Knoxville. Write for prices on larger quantities.

Perennial Rye Grass (No. 819).

A very quick growing grass, early maturing, and furnishes good grazing and hay. It makes the quickest growth of any of the grasses. Sow by itself 50 pounds to the acre, either in the Spring or the Fall. Prices: 25 cents per pound, postpaid; 20 cents per pound, f. o. b. Knoxville. Write for prices on larger quantities.
SEED OATS

Winter Turf Oats or Virginia Gray (No. 825).

While this is a winter oat, when sown early before March 15th, this oat will out yield the ordinary spring oat. It will yield an abundant crop of large, heavy grain. It is desirable to sow this in the spring for a seed crop to be used in the Fall. In so doing you will do away with cheat and cockle. Every few years this oat should be grown in the spring to insure good, pure seed stock for the following Fall. Write for prices.

The Burt 90-Day Oat (No. 826).

We have found that Burt Oat is one of the very best Oats for Spring sowing. It is one of the earliest, if not the very earliest of the Spring Oats. This gives it a long seeding season, as it may be sown anywhere from the first of March to April 15th. Our sales of this oat have increased largely during the last few years. Our customers are very enthusiastic in their praises of this. The price of the Oats varies. Write us for prices when you are ready to sow.

Red Rust Proof (No. 827).

This Oat is all that the name implies. It is practically a rust proof oat and this makes it one of the most popular oats for sowing throughout the whole South. It is not as early as the Burt Oat, but it is very productive. It heads out exceedingly well, and from our past experience we have no hesitancy in heartily recommending it to our customers. Write for prices.

Fulgrim Oats

(No. 829).

A selection from the Red Rust Proof. In the extreme South the Fulgrim can be sown in the Fall, but for all other sections it is a Spring Oat. Write for prices.

Northern White Oats

(No. 830).

The White Oat is largely grown on thin or medium land. It is a taller grower than the Black Oat, and some people prefer it for thin land because it will make more growth than the Black Oat. Just let us send you a sample and price of this oat. On land where there is no danger of rust there is hardly any better oat than the White. Write for prices.

VETCH

Hairy Vetch (Vicia villosa) or Winter Vetch. (No. 835). Sow in October with ryegrass or winter oats.

Cyclone Seed Sower (No. 836).

The hand sower that scatters evenly, thoroughly and easily. Use it with any seeds that can be sown broadcast—or with ground bone or ashes or fertilizers. A Cyclone will pay for itself in three or four hours work. It gives absolutely even distribution and so will make three bushels do the work of four. It also has an automatic feed adjustment, giving a positive force feed throughout; quickly adjusted, started or stopped and can't clog—no waste of seed. Everyone needs a hand seeder. Price, $2.25, postpaid.

Hairy Vetch and Oats.
Mammoth Yellow Soya Beans, grown at the University of Tennessee Experiment Station.

For the feeding of milk and cattle Soya Beans are unexcelled. The bean has a greater feeding value than cottonseed meal and the cost of feeding is lower. They are also a splendid feed for the production of beef cattle. Soya beans are good to "hog off," as they are a very valuable feed for hogs. The acreage of Soya Beans has increased a hundred fold in the United States during the last few years. We are selling more and more Soya Beans each year; we sell now more than a solid train load each year. But we believe that even now the Soya Bean business is in its infancy. This will eventually be one of the principal crops throughout the South.

Mammoth Yellow Soya Beans (No. 837)

The standard variety of Soya Beans. For a general crop this is by far the very best variety. Under average conditions the plants grow from three to five feet high. It takes from 120 to 150 days to mature a crop of seed. This variety yields both a good crop of grain and roughage. Do not, under any circumstances, plant this bean more than two inches deep. For all-around purposes this variety is the best to use. The seed are large yellow. Write for prices.

ITO SAN SOYA BEANS (No. 838)

The Ito San Soya Bean is about five weeks early in maturing than the Mammoth Yellow. It is valuable to use in rotation where you plant several varieties of Peas and Soya Beans to hog off. It is also used as a general crop Soya Bean North of Kentucky where the Mammoth Yellow matures too late for general use. Write for prices.

MUNG BEANS (No. 839)

During the last year the Mexican Bean Beetle has played havoc with crops of Cow Peas and Soya Beans in certain sections. The Mung does not seem to be bothered by the Bean Beetle. Mung Beans are a legume like Cow Peas and Soya Beans, the roots being full of nodules. The plant grows from 3 to 5 feet high, depending on the quality of the soil. They are easy to cure and make a good hay. Plant from 3 to 5 pounds of the seed to the acre, drilling rows the same as you would Soya Beans. The seed are very small, being about one fourth the size of the average Soya Bean. For this reason only a limited amount are required to the acre. If sown broadcast use about 10 to 15 pounds to the acre. Prices: One pound, 50c, postpaid; 4 pounds, $1.75, postpaid.

O-TOO-TAN (840)

The O-TOO-TAN Soya Bean is the heaviest yielder of Hay of all Soya Beans. It is late in maturing, and produces a great abundance of Hay. The stalk grows to a large height but they are not as coarse as some of the other varieties. The seed are small and are black in color. It requires about ¼ bushel of seed to the acre. Prices: 1 pound, 50c, postpaid; 4 pounds, $1.50, postpaid; 10 pounds, and all over not postpaid 25c per pound. Write for prices on larger quantities.

Laredo Soya Beans (841)

This variety has been tried out for seven years in the South. Yields as high as thirty bushels of the seed to the acre have been reported. The Laredo matures fully five weeks earlier than the O-Too-Tan. The Laredo does not scatter as badly as some of the other varieties when it is harvested for feed and holds its leaves well, leaving a good Hay after the beans have been threshed out. The stalks grow to a good size. The seed are small and are drilled in rows. One bushel of Laredo Beans will plant ten to twelve acres. Prices: 1 pound, 50c, postpaid; 4 pounds, $1.75, postpaid; 10 pounds and over, not postpaid, 30c per pound. Write for prices on larger quantities.
Cow Peas

60 pounds to the bushel

Cow Peas are one of the most profitable, if not the most profitable crops of the Southern farmer. They make one of the largest yielding, and most nutritious forage crops known. When the crop of hay and forage is taken off, the roots and stubble may be turned under. This leaves the soil in the very best of mechanical condition, and its productiveness is increased many fold.

Prices on Cow Peas vary. Write for special prices. East Tennessee is one of the largest pea producing sections in America. We handle more of these than any Southern seed house. Buy from headquarters.

For growing for hay they are unsurpassed, and for ensilage they are equally as good.

Use commercial fertilizers containing phosphate and potash.

Cow Peas are frequently sown with cane seed, German millet and Kaffir Corn. Sow one peck of cane or kaffir corn with one bushel of Cow Peas to the acre. Sow one-half bushel of German millet with one bushel of Cow Peas to the acre.

We have the following varieties in stock.

New Era—The smallest seeded Cow Pea. Seed bluish-black in color, quite speckled. It is very erect in growth, very early in maturing, and produces a very heavy crop of seed. Very easily handled by machinery. Suitable for the North.

Brown Whipporwill—This is the standard of all Cow Peas. It makes a vigorous growth, is erect, and produces considerable vine. The seed is mottled dark brown, on a buff colored body.

Plant of Whipporwill while in bloom, showing root development.

Clay—This variety is the standard for turning under. It produces a very heavy vine, and has a tendency to seed lightly. The seed is a light brown in color. Best variety for the South.

Black—Vines heavy on rich land, but on poor land grows bush. The seeds are black. This is a standard variety, and is very largely grown in certain sections of the South. Makes an enormous yield of rich, nutritious feed. It is a great improver.

Brabham—Very small seed, similar in color to the brown whipporwill. Sometimes known as the little Whipporwill. Vines upright, branching more than the Whipporwill. Very prolific. On account of the small seed it does not require as many seeds to the acre as the other varieties of Cow Peas. Makes a very heavy yield of seed, and matures about the same time as the Whipporwill.

Taylor—Sometimes known as the Blue Whipporwill. Rapidly becoming a favorite. This is perhaps the largest seed-yielding variety. The seed is the largest of any Cow Pea. Vines heavier than the Whipporwill the seed is about the same color as the New Era, though the body color is somewhat lighter.

Red Ripper—Valuable for growing in corn. Late in maturing and heavy viner. The seed is dark red, and is about the same size as Whipporwill.

Mixed—We can supply mixed peas for growing for hay and forage. For this purpose these are very desirable, as the bush varieties have a tendency to somewhat support the vines.

Black Eye—This variety is very valuable for table purposes. It makes a large yield of peas.

Lady—This makes a splendid variety for table use. It is a very small seed, and has a remarkable flavor, superior to any cowpea. Prices: 25 cents per pound postpaid; 20 cents per pound f. o. b. Knoxville. Write for prices on larger quantities.

Velvet Beans

Velvet Beans make the greatest growth of vine of any forage plant in the same length of time. Plant in rows four to five feet apart at the rate of about one-half bushel to the acre. In this section they should be planted about May the 1st. Velvet Beans make a growth of vine 12 to 15 feet long. As they make such a tremendous growth of vine they are great soil improvers where the crop is turned under. They gather nitrogen about like a Cow Pea. In the extreme South, Velvet Beans serve as winter pasture.

100-DAY VELVET BEANS—This is the quickest growing and the earliest maturing Velvet Bean. While it is called the "100-Day" Velvet Bean, it will hardly mature a crop of seed under 140 to 150 days. However, in 100 days it will produce a wonderful growth of vine. If planted early enough in this section as far North as Knoxville it will mature seed, provided we do not have a very early frost. This bean makes a very large root development, and is exceedingly valuable as a soil improver. Prices: per packet, 10c; pound, 20c. Write for prices. (No. 855).
Remember, that we are SEED SPECIALISTS, and that we carry in stock large quantities of seeds at all times. We are located in the greatest diversified farming section in the United States. We understand your problems. Let us serve you when you want Seeds.

Farm Seeds—Change in prices very often. For this reason it is impossible for us to quote a fixed price on them in this catalog in quantities. Whenever you are interested in Farm Seeds in quantities, just drop us a card stating the article you are interested in, and request us to quote you the day's prices. We will gladly do this at any time.

**KAFFIR CORN**

**White**

50 lbs. to the bushel. (No. 860).

This makes a large growth of forage, and also is valuable on account of its large yield of grain, which is valuable feed for all kinds of stock as well as poultry. Good to sow with Cow Peas, as the Kaffir Corn will hold the peas off the ground, thus improving the pea crop. Cut both together for a splendid feed. If sown by itself for forage, Kaffir Corn should be sown at the rate of three-fourths to one bushel to the acre. If sown for forage always cut before fully headed out.

**CANE SEED**

50 lbs. to the bushel

Early Amber—Grows about ten to twelve feet high. Very fine forage. Sow broadcast at the rate of one to one and one-half bushels to the acre. If drilled, sow in rows three to four feet apart, and about one peck to the acre. (No. 861).

Early Orange—One of the very best varieties for making sorghum syrup. Grows very similar to the Early Amber, but is a better cropper. Splendid for forage. (No. 862).

Ribon Cane—This variety excels as a syrup cane. It makes a large yield of syrup, and the quality of the syrup is splendid. It is also excellently adapted for forage. The seed of this variety somewhat resemble the seed of broom corn. Foliage is fine and slender, giving it its name. Is splendid for sowing with corn as an ensilage crop. Prices: Pound, postpaid, 25c. Write for prices on larger quantities. (No. 863).

**MILLET (No. 865)**

German Millet—50 pounds to the bushel

This is a quick-growing, easily cured hay crop. Seed thickly, using about one bushel to the acre. Cut when in bloom, for if allowed to stand until the seeds get hard, the stalks get hard, and make an inferior hay. Millet is frequently sown with the Whipporwill Cow Pea. Sow from May to the end of July. It makes a crop from six to eight weeks from the seeding.

**BUCKWHEAT (No. 866)**

A very valuable late summer crop, especially in the mountains. This is a splendid food for bees, and is easily grown. It is good to turn under to enrich the ground, and is also a good smother crop, where ground contains objectionable weeds. Price 15c pound, postpaid. Write for prices on larger quantities.

**BROOM CORN (No. 867)**

Evergreen—A splendid variety. The standard in this section. Has a good appearance when ripe, and grows long and straight. Sow in drills three feet apart; and thin out to three inches in the row.

Prices: 20c pound, postpaid; 15c pound express.

**MAMMOTH YELLOW SUNFLOWER (No. 869)**

This is the best variety for farm purposes. Makes very large heads, which are well filled with seed. Cultivate same as corn. When the seed are ripe, cut off and put in a corn crib for curing. When sufficiently cured they can be flayed out and run through a threshing machine. Prices: per pound, postpaid, 20c; not postpaid, 15c pound.
SUDAN GRASS (No. 870)

Sudan Grass has steadily increased in popularity since its introduction in the United States. It now bids fair to become one of the principal forage crops in the South. Every one is enthusiastic in their praise of this crop. In the opinion of many, Sudan Grass will eventually supersede millet as a forage crop. Sudan Grass produces two or three good cuttings of hay each season, where most other forage crops produce but one.

The quality of Sudan Grass Hay seems to be very nutritious. It is well suited for market purposes and for home use. The several cuttings make a great quantity of hay to the acre, and this is one of the big features in the popularity of this crop.

Culture: Sudan Grass in an annual and requires seeding each season. Wait till the ground becomes thoroughly warm before sowing the seed. It can be sown in drills for cultivation or can be sown broadcast. For cultivation sow in drills from eighteen inches to two feet apart at the rate of 10 pounds to the acre. For broadcast sowing sow at the rate of 25 to 30 pounds to the acre. Cut the hay as early as possible, just as soon as the grass is fully headed out. Sudan Grass stools after the first cutting and makes a somewhat thicker growth for the second and third cuttings. Prices: 20c per pound, postpaid. Price f. o. b. Knoxville, one pound, 15c. Write for prices on larger quantities.

DWARF ESSEX RAPE

(No. 871)

Culture: Sow in March and August, about six pounds to the acre, when sown broadcast. When sown in rows use two to three pounds to the acre. If sown in drills, give good cultivation and make rows 24 to 28 inches apart. It is ready for use in about eight or ten weeks from date of seeding. Rape makes an excellent feed for fattening sheep and swine, and is a good feed for milch cows. It is good feed for young lambs at weaning time. This is a good catch crop. It is also an excellent crop to destroy weeds. Prices: 25c per pound, postpaid; 20c per pound, express. Write for special quotations on larger quantities.
Seed Corn

Neal's Paymaster Corn (No. 880)

A great corn which is destined to become one of the most generally used varieties in the South. The stalks are tall and vigorous, bearing mostly two ears of good size. The ears are firm and have large, deep grain, well set on a medium sized red cob. Paymaster Corn thrives on average upland, combining the many good points of the prolific types, with the larger one eared types. It is a splendid yielder and fairly early in reaching maturity, only a few days later than Hickory King. The grain is firm, but is not flinty. It is a good corn for general use on the farm.

Prices: Packet, 10c; pound, 30c, postpaid; not postpaid, 14 pounds (peck), $1.10; 56 pounds (bushel), $4.00

Mayo's Tennessee Red Cob Corn (No. 881)

Tennessee Red Cob Corn is known throughout the South as the standard large red cob corn. It is a good yielder and is especially adapted to bottom land. The stalks are large and tall growing, bearing from one to two large ears, well filled with large grain on a medium sized cob.

Prices: Packet, 10c; pound, 30c, postpaid; not postpaid, 14 pounds (peck), $1.10; 56 pounds (bushel), $5.50

Mayo’s Hickory King (No. 883)

Now, if you have thin upland, there is absolutely no corn which will give you as good results as Mayo’s Hickory King. The University of Tennessee Agricultural Experiment Station highly recommends Hickory King for thin upland. No other corn will produce anything like the number of bushels to the acre on this kind of land as the true stock, Hickory King. We carefully select this corn for seed purposes, and, although it is one of the oldest varieties of corn grown in this section, we are always unable to supply the demand for it. We have handled this corn for many years, and our constantly increasing sales of this corn show that it has splendid merits. The ears are small, having eight rows firmly set upon a very small cob. The cob is the smallest of any variety of corn grown in this section. In true stock the grain will about cover the cob in its largest place. Owing to the very small cob, the yield to the acre exceeds what one would expect from the small ear. The stalks grow rather small and thin, thus permitting a thick planting. This also increases the yield to the acre. For milling purposes this corn has no equal.

Prices: Packet, 10c; pound, 30c, postpaid; not postpaid, 14 pounds (peck), $1.10; 56 pounds (bushel), $3.50

Mayo’s Golden Dent (No. 884)

Mayo’s Golden Dent Corn is now thoroughly acclimated to this section of the country. It has been grown here for years. For a long time we have needed some good variety of Yellow Corn for general use on the farm. Many people say that yellow corn is better for feeding than white corn. Certainly yellow corn has a place on the farm. Most yellow corns are Northern grown, and for this reason they are not adapted to our use except where a very early variety is required. Mayo’s Yellow Dent matures in about 100 days, just a few days ahead of Hickory King. Medium in height, with stocky stalks having abundant fodder. We have known of several yields of this variety as high as 100 bushels to the acre. Large, long ears, with medium sized cob. The grain is a rich yellow good size, and is just about the right texture being neither too flinty or too chaffy.

Prices: Packet, 10c; pound, 30c, postpaid; not postpaid, 14 pounds (peck), 90c; 56 pounds (bushel), $4.00

HICKORY KING CORN
Hasting’s Prolific (No. 886)

The greatest yield per acre in the world was made with a Prolific type of Seed Corn, however, this was under abnormal conditions. Prolific Corn has its place on the farm. In our opinion it is not the proper variety for a general Corn crop. Under average conditions there are many varieties of corn which will out yield the prolific type. Hastings Prolific Corn has a large stalk eight to twelve feet tall according to the soil and season. It produces lots of fodder and is of medium size two or more to the stalk. The size of the ear depends largely upon the soil. Oftimes this variety makes from four to six ears to the stalk. The grains are deep, white and hard. Cob is small. Shell corn is very heavy usually shelling out from sixty-one to sixty-three pounds of grain to the bushel. This variety is splendid for late roasting ears. It requires from 12 to 130 days to develop hard corn. It is splendid for ensilage purposes. The good sound hard grain makes excellent meal. We recommend this variety for grain production where you are prepared to give it unusual cultivation and a very rich soil. We do not think it advisable for use on thin or poor land. Prices: Packet, 10c; pound, 30c, postpaid; not postpaid, 15 pounds (peck) $1.25; 56 pounds (bushel) $4.00.

Albermarle Prolific Corn (No. 885)

Like all other Prolific Corn this is splendid when grown under special preparation of the soil and on rich ground. In the past many premiums have been won on this corn for the largest yield per acre. The general quality of the grain is one of the best of the Prolific type of corn. The stalks are tall growing producing abundance of fodder and grain. From two to six ears to the stalk depending upon the strength of the soil. Good for ensilage. Prices: packet, 10c; pound, 30c, postpaid; not postpaid, 14 pounds (peck) $1.10; 56 pounds (bushel) $4.00.

Jarvis Golden Dent (No. 888)

This is the yellow corn which will grow as well on thin land as Hickory King. There has been a demand for a long time for a good yellow corn which would produce well on medium ground. Most Yellow Corns are best suited for rich soils, but the Jarvis Golden Dent is an exception to this. The grain is golden yellow. Stalks are medium in height, bearing two or more well filled ears from seven to nine inches long. It matures about the same time as Hickory King. Prices: Packet, 10c; pound, 30c, postpaid; not postpaid, 14 pounds (peck) $1.10; 56 pounds, (bushel) $3.50.

Northern Grown Corn for Early Maturing

We have the following varieties of corn grown in Northern Ohio. Therefore they are very early maturing. We recommend these varieties for use where an extra early type of corn is needed, especially for hogging off early. Keep in mind that the stalks are small and the ears grow close to the ground. This enables closer planting. These mature in from 90 to 100 days.

WHITE VARIETIES---- North White Dent (No. 889)

Iowa Silver Mine (No. 890)

One of the foremost varieties in its class. Large ears. Grain big, but somewhat shallow; and cob white.

YELLOW VARIETIES---- Improved Lightning (No. 891)

Early maturing; suitable to all soils. Ears long, cob large; grain rich yellow in color. This is a very reliable corn. It does not make a large growth of stalk, but produces two or three ears to the stalk.

Early Golden Dent (No. 892)

Prices on all Northern Grown Field Corns are as follows: Packet, 10c; pound, 30c, postpaid; not postpaid, 14 pounds (peck), $1.10; 56 pounds (bushel), $3.50.
Insect Remedies

There seems to be an insect pest, or fungus disease for every form of cultivated vegetation. We have known for a long time that in order to have good, sound fruit from orchards it was necessary to spray for the different insects and fungus diseases. Today there is a remedy for all these pests. The Boll Weevil can be controlled with Arsenate of Calcium and Arsenate of Lead controls the Tobacco worm. The Mexican Bean Beetle which formally threatened to be a very serious menace to all bean crops can be controlled with Mayo's Dust No. 1 for Dusting, Magnesium Arsenate for liquid spraying, or Sodium Fluoclicate for dusting. Most vegetable crops can be doubled by proper spraying and dusting.

We carry a complete stock in Knoxville of all the proper insecticides and give you below the prices of same. Please remember that poisons cannot be sent by mail. They must be sent by freight or express.

**DRY LIME SULPHUR**—Prices: 1 pound 35c; 5 pounds, $1.25; 25 pounds, $8.75; 100 pounds, $13.00.

**ARSENALE OF CALCIUM**—Prices: 1 pound-35c; 5 pounds, $1.50; 25 pounds, $6.00; 50 pounds, $12.00; 100 pounds, $22.00.

**ARSENALE OF LEAD** (powdered)—Prices: 1 pound, 50c; 4 pound packages, $1.50; 100 pounds, $35.00 F. O. B. Knoxville. Poisons cannot be mailed, they must be sent by express or freight.

**BORDEAUX MIXTURE** (dry)—Prices: 1 pound, 35c; 5 pounds, $1.50; 25 pounds, $5.50; 50 pounds, $9.50. F. O. B. Knoxville. Poisons cannot be sent by mail, they must be sent by freight or express.

**BORDO-ARSENALE**—A combination of Arsenate of Lead and Bordeaux mixture. Prices: 1 pound, 50c; 5 pounds—$2.00; 25 pounds, $7.00. Poisons cannot be sent by mail, they must be sent by express or freight.

**NICOTINE SULPHATE**—(Liquid) Prices: 1 ounce bottle, 35c; ½ pound, $1.25; 2 pounds, $3.50; 10 pounds, $13.00. Poisons cannot be sent by mail, they must be sent by freight or express.

**SLUG SHOT**—Prices: 1 pound, 25c; 5 pounds, 55c, postpaid.

PARADICHLOROBENZENE—For Borers. 1 pound, 40c; write for prices on larger amounts. We can supply this in any quantity. Poisons cannot be sent by mail, they must be sent by freight or express.

**MAYO'S DUST No. 1**—A standard form of Arsenate of Calcium, Flowers of Sulphur, and Hydrated Lime mixed and prepared for dusting for the Mexican Bean Beetle. Prices: 1 pound package, 35c; 4 pound package, 60c each. Poisons cannot be sent by mail, they must be sent by express or freight.

**MAGNESIUM ARSENATE**—For liquid spray for the Mexican Bean Beetle. 1 pound package, 50c; 2 pound package, 85c, F. O. B. Knoxville. Poisons cannot be sent by mail, they must be sent by freight or express.

**SODIUM FLUOCILICATE**—For dusting for the Mexican Bean Beetle. This must be combined with Hydrated Lime. Use one part Sodium Fluoclicate and one part of Hydrated Lime. Prices: 1 pound package, 35c each; 4 pound package, 3.100 each. F. O. B. Knoxville. Poisons cannot be sent by mail, they must be sent by freight or express.

**LONDON PURPLE**—Suitable for dust or spray. Prices: 1/4 pound, 20c; 1 pound, 60c, F. O. B. Knoxville. Poisons cannot be sent by mail, they must be sent by freight or express.

We carry a complete line of dusters and sprayers. Write us for special literature and prices when you are interested.

We will also be glad to mail you a spraying chart telling when and how to spray, upon your request. Just drop us a card and we will forward a chart to you without cost to you.

COTTON SEED

In the past we have not handled Cotton Seed, as there has not been practically no Cotton grown in the Appalachian or Upper South. However, we have found that Cotton can be successfully and profitably grown in this section of the South. There is now quite an interest in this crop in the Upper South. If you select an "Early" soil, plant the Early Express Cotton Seed using good fertilizer you should have a splendid prospect of a goodas well as profitable crop. The University of Tennessee Experiment Station have recommended the Early Express Cotton as the proper variety for this section around Knoxville.

**EARLY EXPRESS COTTON**

This is one of the earliest of the high yielding varieties. It is superior to any of the standard varieties in length of lint (averaging one and a half inches) and it brings a high price. It should be planted at the rate of one bushel to the acre in 3 foot rows. Prices: pound, postpaid, 35c; 3 pounds $1.00. Not postpaid 10 pounds, $1.00; 30 pounds (bushel) $2.25.

**KING'S EXTRA EARLY COTTON**—A good variety for our short seasoned cotton sections. Prices: Pound, postpaid, 35c; 3 pounds, $1.00; not postpaid, 10 pounds, $1.00; 30 pounds (bu.) $2.00, 100 pounds, $6.00.
PLANT DEPARTMENT

We send all plants direct from our growers, and for this reason plants can not be included in same shipments as seeds. Remember that plants can not be pulled in a very wet spell, and for this reason some times there will be a slight delay in getting your orders out. However your order will be forwarded just as soon as possible.

Cauliflower Plants: Ready after April. Prices postpaid per dozen, 30c; 100 postpaid, $1.75.
Celery Plants: Ready after April. Pascal and Golden Yellow Self Blanching. Postpaid per dozen, 30c; 100 postpaid, $1.00.
Egg Plants: Ready after May 1st. New York Improved Purple Spineless, postpaid per dozen, 30c; 100 postpaid, $2.50.
Pepper Plants: Ready after May 1st. Ruby King, and Chinese Giant. Prices: Postpaid per dozen, 30c; 100 postpaid, $1.50.
Tomato Plants: Earlian, June Pink, New Stone, and Ponderosa. Price per dozen postpaid, 30c; per 100 postpaid, $1.25. Ready after April. Write for prices on larger quantities.

Sweet Potato Seed and Sweet Potato Plants

After March 15th, we can supply the following varieties of Sweet Potato Seed: Nancy Hall, Southern Queen, San Domingo, Japanese Yam, and Triumph. After May the first, we can supply the same varieties of plants. Write for prices on these and we will be pleased to quote.

FERTILIZERS

Shredded Sheep Manure. We obtain this from the large stock yards. This is subjected to a treatment of intense heat which destroys any weed seeds. It is free from straw and sawdust. It is so concentrated that one bag of 100 pounds is about equal in value to an ordinary one-horse load of stable manure. Price: $2.70 per 100 pound bag.

Acid Phosphate, 16%. The standard fertilizer for use on grain or grass. Price, $1.75 per 125 pound bag.

Bone Meal. Good for lawns, and for shrubbery. Price, $3.50 per 125 pound bag.

High Grade Fertilizer (16-4-4) at $3.50 per 125 pound bag.

Blood and Bone Fertilizer. 10-2-2. The standard dressing or gardening Fertilizer. Good for Lawns also. Price $3.00 per 125 pound bag.

Land Plaster. $1.00 bag of 200 pounds; $14.00 ton.

INOCULATION

One of the highest priced fertilizer materials is Nitrogen. By inoculating your legume crops you can add nitrogen to your land at a very small expense. Inoculated legumes take nitrogen from the air to supply the plant, resulting in faster growth, earlier maturity and larger crops. Inoculated legumes take up more nitrogen than the plant itself requires, the surplus remaining to the benefit of future crops. Inoculated legumes develop larger root systems than when not inoculated and therefore reach the immense stores of potash and phosphorus in the subsoil, bringing them to supply the plant. When the roots and stubble decay these elements are returned to the soil in a form available for future crops. Inoculated legumes, by taking their nitrogen from the air, save the soil. When not inoculated they drain the soil of its nitrogen just as wheat or timothy or other non leguminous plants.

We can supply NITROGEN CULTURE (dry) and NOD-O-GEN (jelly). These cultures are prepared for Alfalfa, Sweet Clover, Soy Beans, Cow Peas, All Clovers. Vetch, Garden Peas and all other legumes.

PRICES

Nitrogen (dry form)

½ Bushel size (inoculates 15 lbs. seed) $0.40
½ Bushel size (inoculates 30 lbs. seed) .60
1 Bushel size (inoculates 60 lbs. seed) 1.00
5 Bushel size (inoculates 300 lbs seed) 4.75

WRITE FOR PRICES ON LARGER QUANTITIES ON ANY OF OUR FERTILIZERS.

POULTRY SUPPLIES, INCUBATORS, BROODERS, AND FEEDS

We carry a complete line of Incubators and Brooders, also the International Sanitary Hoover. Write for special catalogues and prices.

The Moe galvanized drinking founts, Hoppers, etc., are the best made. We carry a full line of these. Write for special catalog and prices.

MAYO'S LAWN GRASS

Mayo's Select Lawn Grass Seed (No. 900)

Mayo's Select Lawn Grass Seed is the product of over forty years study in making an ideal lawn for the central South. We have some of the finest lawns in America in this section and they were made with this mixture. Our Lawn Grass Seed will make a heavy turf in a remarkable short time, and retains a rich green color from year to year. The basis of a good lawn should be Kentucky Blue Grass. However, Blue Grass takes several years to become firmly established. Mayo's Select Lawn Grass Seed is blended with Blue Grass and other Grass Seeds of quick growth, so that in a year or so the quick growing grasses disappear leaving a rich velvety turf of Blue Grass. Our Lawn Grass is composed entirely of our Mayo's Select Grades of Seed, which are the best recleaned seeds that the world affords. It is free from chaff and weighs from 26 to 30 pounds to the measured bushel. We have thoroughly tried this mixture for many years and have found it to be the best lawn grass seed for this part of the country. Prices: Postpaid, 1 pound, 70c; 2 pounds, $1.35; 5 pounds, $3.25. Not postpaid, 65c pound; 10 pounds, $6.25; 100 pounds, $60.00.

Mayo's Shady Lawn Grass Mixture (No. 901)

This mixture is prepared for shady places, and is composed of the various grass seeds which grow best where there is an abundance of shade. Prices: Postpaid, 1 pound, 70c; 2 pounds, $1.35; 5 pounds, $3.25. Not postpaid, 65c pound.

Directions for Making a New Lawn

Cultivate the surface deeply from eight to ten inches and make the soil very rich. The richer the ground the better. You cannot well expect grass to grow well on poor and worn out soils. Cultivate the soil to kill the weeds. Remember that nature has provided all fertile soils with weed seed, and unless these are killed you will have them to contend with later. It is advisable if possible, to plow under some green manure crop such as Cow Peas, Soy Beans or Clover previous to the preparation of the seed bed. This, of course, takes one summer longer, but the time is well spent. After the soil has been harrowed, it should be packed or rolled with a roller. Then the fertilizer should be applied. Where it can be had, well rotted stable manure is good. However, we carry in stock shredded sheep manure in 100 pound bags. This is concentrated, being free from straw and saw dust. One bag of this is equal in value to about a one horse load of ordinary stable manure. The sheep manure is also free of weeds, as it has been treated with intense heat to kill the weeds. For the average lawn of 50 by 100 feet, use the following fertilizers, 200 pounds Shredded Sheep Manure, 50 pounds Bone Meal, 100 pounds Acid Phosphate, and 500 pounds of ground limestone or land land plaster. Sow about 15 pounds of Mayo's Lawn Grass Seed Mixture on the average lawn, or one pound to every 300 square feet, and at the rate of 50 pounds to the acre. For fertilizing the larger new lawns use the fertilizer in the same proportions as specified above. These fertilizers can all be had at our store. For prices, see listed in Fertilizers. Just as soon as the new grass is high enough it should be clipped with the lawn mower. This should be continued all along just as soon as the grass grows tall enough. Do not rake the clippings. Allow them to drop back on the ground, as this somewhat increases the soil fertility. Remember that frequent mowing improves the lawn.

For Renovating Old Lawns

Oftimes the soil in old lawns becomes sour. Trim up the trees so as to provide more sunlight. Harrow the surface of the ground lightly. Sow Mayo's Lawn Grass Seed Mixture in half the quantities as recommended for the new lawns. Use fertilizers in half the quantity as directed for the new lawns. Mow the grass frequently.
